

SABRE® DECON

CLEANSE - STEP I and SOOTHE - STEP II

Technical Specifications

SABRE DECON FORMULA

It is impossible to both clean and soothe the skin with a single formula. SABRE DECON effectively uses two unique solutions to combat the effects of chemical agents, prevent reactivation (exercising/hot showers) and stop further spreading of chemical agents to limit contaminated areas.

CLEANSE - STEP I

Removes chemical agents from the skin, prevents additional penetration into the pores and further spreading of chemical agents to limit contaminated areas.

SOOTHE - STEP II

Moistens cleansed skin treated first by CLEANSE - STEP I and dramatically reduces the affects of chemical agents.

FIELD TREATMENT MODELS

Ideal compact size for usage on officers and subjects after deploying chemical agents to control subjects / inmates (Cruisers, In-Take Areas, Arsenal Room, EMS).

Model # & Description:	SD-40	4 oz CLEANSE - STEP I & 4 oz SOOTHE - STEP II
	SDC-40	4 oz CLEANSE - STEP I
	SDS-40	4 oz SOOTHE - STEP II
Height:	5.25" / 13.2 cm	
Diameter:	1.625" / 4.2 cm	
Weight:	4.0 oz. / 112 gr. / 120 ml	
Warranty:	2 years	
Dispersal:	Squeeze Bottle with Disk top cap	
Content:	About 25 Applications (Approx 6 people)	

TRAINING TREATMENT MODELS

Ideal large size for decontaminating multiple recruits or in-service officers after chemical agent contamination drills (Training Academies).

Model # & Description:	SD-1G	1 gallon CLEANSE - STEP I & 1 gallon SOOTHE - STEP II
	SDC-1G	1 gallon CLEANSE - STEP I
	SDS-1G	1 gallon SOOTHE - STEP II
Height:	13.375" / 33.9 cm	
Diameter:	6.125" / 15.5 cm	
Weight:	1 gall / 128 oz. / 3.58 kg / 3.84 L	
Warranty:	2 years	
Dispersal:	Pump	
Content:	About 800 Applications (Approx 200 people)
