- Made from recycled plastic bottles
- Tileable thru-cut pattern
- Sound-dampening effect
- Easy to mount and process
- Impact-resistant
- Sold in sets of 2 panels

Material	PET Felt
Size	1200 x 600 x 9 mm
Weight per set	2.31 kg
Reaction to fire classification	B-s1, d0

ARCS PET FELT ACOUSTIC PANELS

Arcs prove that acoustics can be fun and playful. The panels have a repeatable thru-cut pattern, inspired by the Japanese Seigaiha waves. Thanks to their tileable design, Arcs panels can seamlessly cover a wall of any size. Create a special 3D effect by applying a contrasting colour behind.

PET FELT

PET Felt is a sustainable and durable material made from recycled plastic bottles. Thanks to its open-cellular structure, PET Felt demonstrates great acoustic properties. PET Felt panels are soft to touch, impact-resistant and easy to process.

COLOURS

Since PET Felt is a recycled material, slight colour deviations may occur between different batches. It is recommended to order the required quantity at once to make sure the panels come from the same batch. Keep in mind that the panels have a nap direction on both sides. To avoid alterations in appearance, we advise to check the nap direction and mount the panels on the same side.
