Weight per set	2.67 kg
Reaction to fire classification	B-s1, d0

ACOUSTIC PET FELT PANEL RAINBOW

One might see a rainbow, others will notice clouds or even playful waves. Whatever you see in it, the Rainbow panel instantly brighten up a room, both aesthetically and acoustically. Its v-cut pattern is tileable, so you can seamlessly cover a surface of any size. Thanks to the open-cellular structure, PET Felt provides a gentle sound-dampening effect.

PET FELT

PET Felt is a sustainable and durable material made from recycled plastic bottles. Thanks to its open-cellular structure, PET Felt demonstrates great acoustic properties. PET Felt panels are soft to touch, impact-resistant and easy to process.

COLOURS

Since PET Felt is a recycled material, slight colour deviations may occur between different batches. It is recommended to order the required quantity at once to make sure the panels come from the same batch. Keep in mind that the panels have a nap direction on both sides. To avoid alterations in appearance, we advise to check the nap direction and mount the panels on the same side.
