CAT6 NETWORK CABLE

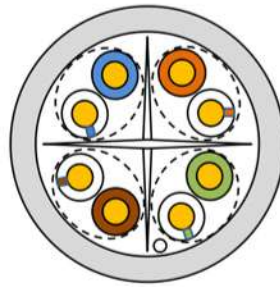

ALHAAN

To meet today's needs of high speed network applications, our CAT6 Cables are designed to produce a strong and high standard performance with maximum bandwidth. Used mostly in generic cabling systems for transmissions, these network cables equip in communication in buildings and other structures. This cable is ideal due to its ease of installation into tight cramped spaces because of its sleek and smooth design. The cable supports horizontal networking applications over large distances due to its durability without issues of noise interference or crosstalk produced by any external equipment.

FEATURES:

- ▶ Imported PE insulation
- ▶ Effectively improve oxidation resistance and ensure conductor stability
