

CABLES | SC-16AWG

## SPEAKER CABLE 16 AWG

ALHAAN

The SC-16AWG cable is best suited to use for audio and instrumentation as they offer finest audiophile performance with clear and sharp sound transmission and accurate response. These are often used for the purpose of connecting speakers where large crowds are expected such as concerts and stage performances. The high quality of these cables ensures repeated use without compromising on its operation. Besides the unequivocal crystal-clear performance, these cables also offer ease of installation and are more flexible than many cables available in the markets.

### FEATURES:

- ▶ High Purity OFC
  - 4N oxygen-free copper, 99.99% high dull 7-strand winding technology reduces conductor resistance and enhances sound
- ▶ Enhanced protection
  - Imported PE insulation. Effectively improve oxidation resistance and ensure conductor stability
  - Imported environmentally friendly PVC material
- ▶ Transparent and flexible, flexible wiring. Thickened protective layer, pressure resistant, wear resistant, more peace of mind

## TECHNICAL SPECIFICATIONS

MODEL	SC-16AWG
Product Type	Speaker/Audio systems cables AWG16
Specification	2x260/0.08mmBC/TC+2.1mmPE+OD4.2*8.4mmPVC
Conductor	Material: 2x260/0.08mmBC/TC
Jacket	Insulation : PVC Construction : 2 core Jacket : 4.2*8.4 mm Jacket Color : Lucency
Operation Temperature	-20°C To +70°C
Working voltage	<80 V( speaker cable)
Packing	Packing: 100m/roll Q'TY /CTN: 4 Rolls/CTN
