

VOLUME CONTROL | SVC-30S

30W VOLUME CONTROL

ALHAAN

The SVC-30S 30W Volume Controller is a high-performance model used for quality audio applications in Multi-Channel audio systems. This helps the amplifier to produce low noise and distortion and can be used in high end and professional audio systems. This model has a highly advanced wire design which makes it compatible with various systems. The stylish design makes it ideal for blending into any interior backgrounds.

FEATURES:

- ▶ Full ABS material with knob adjustable mode.
- ▶ Easy to install by using general standard type 86 bottom box.
