

MICROPHONE | WLC-110

WIRELESS COLLAR MICROPHONE

ALHAAN

The WLC-110 Wireless Collar Microphone is designed for speech and general vocal usage like recordings and other remote monitoring applications. This mic has a sleek and small housing making it possible to be clipped to neckties, lapels and other articles of clothing by a rotatable tie-clip which helps it stay on securely without making it obvious to the audience. This product is powered by batteries which enable long hours of continuous usage, thus making it cost effective. The outer coating helps reduce breath noise while simultaneously providing wide range of dynamic frequency responses across a large area making it ideal for all types of broadcast and theatrical applications.
