

MICROPHONE | WLH-110
WIRELESS HANDHELD MICROPHONE

ALHAAN

The WLH-110 Wireless Handheld Microphone uses cutting edge wireless technology while simultaneously being cost effective, making it ideal for entry level requirements. The simple operation and fast set up make it perfect for usage in flexible spaces and upgrading existing environments and structures where cabling is not easily possible. With its compact and lightweight body as well as the freedom to move while speaking, gives one the room to focus and amplify their voice to deliver or record with superior sound quality.

FEATURES:

- ▶ UHF Wireless Microphone
- ▶ Single receiver
- ▶ Handheld / Headset / Clip mics
- ▶ Frequency range:UHF500-900MHz
- ▶ Channel:fixed channel
- ▶ Modulation mode:FM
- ▶ Frequency respond:60Hz~15KHz($\pm 3\text{dB}$)
- ▶ T.H.D.:<0.1%(1KHz)
- ▶ Received distance:80M

TECHNICAL SPECIFICATIONS

MODEL	WLH-110
Frequency range	620MHZ-950MHZ
Debug mode	FM
Modulation range	25MHZ
Channel spacing	250KHZ
Frequency stability	±0.005%
Dynamic range	100db
Maximum deviation	±45KHZ
AF response	80HZ-15KHZ(±3db)
Overall S/N ratio	105db
Overall distortion	≤0.8%
Receiving sensitivity	12dBuV(80dBS/N)
Total harmonic distortion	<0.3%(at 1khz)
Harmonic interferency	≥50db
Mirror interferency	≥60db
Transmit power	10mW at high power, 3mW at low power
Operating environment temperature	-10°C~+40°C
