

Colour  
is our nature

## 50W DMX/RDM Full-Colour (RGBW) Dimmable LED Driver

### POWERdrive

POWERdrive's dynamic response can be tuned to fit any content - from exceptionally smooth fades in architecture to fast-paced video in entertainment. This constant current LED driver is DMX/RDM compatible, and allows you to create your colour or dynamic show without an external controller. Symbiosis ensures the LED driver works seamlessly together with LED modules, controls and intelligent luminaire elements.

### Product offering

### POWERdrive 561/S

Part number P/N	PW0561S1
Product description	POWERdrive AC, 50W, DMX/RDM, 4 control channels, constant current, 4x 55V outputs, square metal
P/N: WH0081S1	Wiring harness, 8pin Molex DMX, POWERdrive 561/S or 561/A

### Programming tools

Programming interface	<a href="#">TOOLbox pro (TLU20504)</a>
Programming cable set	<a href="#">TOOLbox pro to LED driver, programming cable, 5pcs (TLC03051)</a>
Programming software	<a href="#">FluxTool</a>

### Warranty

Warranty period	<a href="#">General Terms and Conditions</a>
-----------------	--

**Order number configurator**

P/N	LED driver part number.
LED output current	Enter value in 10mA increments, e.g. "0260", "1010", etc.
Dimming curve	"LOG" for logarithmic (default) "LIN" for linear "SQU" for square
Note: Wiring harness (accessory)	WH0081S1 is the ready-made counterpart for the molex connector on the POWERdrive 561/S and 561/A which must be ordered separately if required.

**Input characteristics**

Nominal input voltage range AC	120 - 250V (ENEC), 120 - 277V (UL)
Nominal input voltage range DC	120 - 250V
Maximum input current	0.7A @ 120V / 60Hz
Input frequency range	50 - 60Hz
Efficiency at full load	89%
Power factor at full load	>0.9
THD at full load	<20%
Maximum inrush current	- @ 120V / 60Hz
Surge protection	1kV differential mode (DM) 2kV common mode (CM)
Maximum standby power	<0.5W

**Output characteristics**

Maximum LED output power	50W
Number of LED outputs	4 (UL Class 2)
Programmable LED output current range	200 - 1050mA
LED output type	programmable in 10mA steps via DMX terminal and FluxTool
LED output current tolerance	+/- 5% at programmed LED output current
LED output voltage range	2 - 55V

**Control characteristics**

Control channels	4
Control protocol	DMX/RDM
Dimming range	100% - 0.1%
Dimming curve options	Logarithmic (default) Linear Square
Dimming method	Hybrid HydraDrive

Dimming curves

**Environmental conditions**

Operating ambient temperature (Ta) range	-20 °C to +50 °C
Maximum operating case temperature (Tc max)	85 °C

## LED driver protection

Thermal	The LED output current is decreased whenever the internal LED driver temperature exceeds factory preset temperature. The LED output current is increased again once the internal LED driver temperature drops below this internal temperature threshold. If the internal LED driver temperature continues to increase, despite a decrease in output current, the LED driver will shut down.
LED output short circuit	The LED output current is cut off whenever the LED driver detects a short-circuit. The LED driver will attempt a restart every 400ms after a short-circuit is detected.
LED output overload	The LED driver decreases the LED output current sequentially, until it reaches its maximum rated power, whenever a load that exceeds the LED driver's maximum rated power is connected to the LED output.
Reverse polarity	The LED driver will not yield any current if the polarity of the load on the LED output is reversed. This situation will not damage the LED driver but may damage the LED load.

## LED protection

Thermal protection LED	An external NTC thermistor, which is placed on a PCB near the LEDs, can be connected to the driver via the LEDcode/NTC terminals. The output current to the LEDs is then decreased by 75% whenever the NTC exceeds a maximum allowable temperature, which is specified by the user in the FluxTool software. The default NTC temperature limit is set to 70 °C.
Thermistor value	47kΩ
Suitable thermistors	leaded: Vishay, P/N 238164063473 screw: Vishay, P/N NTCASCWE3473J

**LED driver mechanical details**

Length (L)	typical: 130 mm / 5.12 in
Width (W)	typical: 76 mm / 2.99 in
Height (H)	typical: 30 mm / 1.18 in
Weight	350 g

**Packaging**

Products per box	6, 10 or 45 pcs
------------------	-----------------

**Connector layout**

## Wiring Specifications

Wire Type	AWG 20-16, 0.5-1.5mm <sup>2</sup> solid or stranded copper
Wire strip length	9mm / 0.35in
WH0081S1 wire colors	LEDcode/NTC: brown (-), yellow (+) DMX out: black (shield), black-blue (-), black-white (+) DMX in: black (shield), blue (-), white (+)

## Automatic circuit breakers (MCB)

Maximum loading	MCB type	B10	B13	B16	C10	C13	C16
	Number of LED drivers		14	18	22	14	18

## Calibrated start-up procedure

For optimized DMX dimming performance.	While switching the mains input voltage, the DMX signal to the LED driver needs to be at 100% (255). Unused or open LED outputs of the driver need to be disabled. This can be achieved by programming the driver with the eldoLED Fluxtool software. In the "Setup – Control menu", select "Group scaling" for each unused or open LED output and change the actual value to '0', and write into the driver. For all LED outputs in use, change the value to '255'.

**Standards and compliance**

UL, recognized component	UL 1310 UL 8750 (Class 2 output)
ENEC safety	EN 61347-1 EN 61347-2-13 (Emergency lighting)
ENEC performance	EN 62384
Conducted emissions	EN 55015
Radiated emissions	EN 55015
Radio disturbance characteristics	EN 55022
Harmonic current emissions	EN 61000-3-2
Electromagnetic immunity	EN 61547
DMX	E1.11 – 2008, USITT DMX512-A ANSI E1.20
FCC	Meets FCC Title 47 CFR Part 15 class A if the following conditions are met:  277Vac: If $\leq 1050\text{mA}$ (assuming loads on 1, 2, 3, or 4 LED outputs) 120Vac: If $\leq 1050\text{mA}$ (assuming loads on 1 or 2 LED outputs) 120Vac: If $\leq 900\text{mA}$ (assuming loads on 3 LED outputs) 120Vac: If $\leq 700\text{mA}$ (assuming loads on 4 LED outputs)  For conditions outside these limits, please contact eldoLED.
Restriction of hazardous substances	RoHS3 (Directives 2011/65/EU-2015/863/EU)

**Certifications**

---

## Safety

---

Risk of electrical shock. May result in serious injury or death. Disconnect power before servicing or installing.

The LED driver may only be connected and installed by a qualified electrician. All applicable regulations, legislation, and building codes must be observed. Incorrect installation of the LED driver can cause irreparable damage to the LED driver and the connected LEDs.

Pay attention when connecting the LEDs: polarity reversal results in no light output and often damages the LEDs.

LED drivers are designed and intended to operate LED loads only. Powering non-LED loads may push the LED driver outside its specified design limits and is, therefore, not covered by any warranty.

eldoLED products are designed to meet the performance specifications as outlined at certain operating conditions in the data sheet. It is the responsibility of the fixture manufacturer to test and validate the design and operation of the system under expected and potential use cases, including faults.

Please observe voltage drop over long cable lengths. Longer cable lengths increase EMI susceptibility.

Product renderings and dimensional drawings are generic for the housing type. Product label, connector type and quantity may vary.
