

# 50W 0-10V 'Dim to Dark' LED Driver

#### SOLOdrive

SOLOdrive offers industry-best Natural Dimming to dark - LED dimming made beautiful! With any dimmer, in any application. Symbiosis on SOLOdrive stands for unity, for the SOLOdrive working seamlessly together with LED modules, controls and intelligent luminaire elements.

#### **Product offering**

#### SOLOdrive 561/A-PSE

| Part number (P/N)   | SL0561A4-PSE  |
|---------------------|---|
| Product description | SOLOdrive AC, 50W, 0-10V, 1 control channel, constant current, 2x 42V output, side feed, square metal/plastic |

#### Features & benefits

| Natural dimming      | Dim to dark, smooth brightness changes, excellent flicker performance, adaptable dimming curves, configurable minimum dimming level                 |
|----------------------|---|
| LightShape           | Dim to Warm: decrease colour temperature when dimming   |
| Symbiosis            | Seamless interoperability with LED modules, controls and in-luminaire intelligent devices   |
| LEDcode              | Configurable design to work with most constant current LED modules and arrays, while providing a connection point to integrated peripheral controls |
| Programmable         | Fine-tune your driver for any application   |
| Performance          | Low inrush current and total harmonic distortion (THD), high power factor and efficiency  |
| Camera compatibility | Hybrid HydraDrive technology is proven to work in TV studios and security camera environments   |

### Order number configurator

| specify the differing currents in LED output 1/2.   |
|---|
| "DTW" stands for Dim to Warm  |
| "LOG" for logarithmic (default)   |
| "LIN" for linear  |
| "SLN" for soft-linear   |
| "SQU" for square  |
| Leave blank for default minimum dimming level of 0.1%. Specify in 0.1% increments, e.g. "10.5" for 10.5%. |
| LightShape-specific option. Enter the LEDs' CCT as "XX-YY" where XX is LED                                |
| output 1 and YY is LED output 2. Available options per output: 18, 20, 22, 25,                            |
| 27, 30, 35, 40, 50, 57 and 65. E.g. "18-50" for 1800K on LED output 1 and                                 |
| 5000K on LED output 2.  |
|   |

| Gamut lumen output | Enter the lumen output range for LED output 1 and 2 as "XX-YY" where XX is LED output 1 and YY is LED output 2. Available range per output: from "01" for 100lm to "99" for 9900lm. E.g. "10-12" for 1000lm on LED output 1 and 1200lm on LED output 2.   |
|--------------------|---|
| Path CCT           | Leave blank if Path CCT requires the same values as Gamut CCT. Or specify<br>the Path CCT values as "XXYY" where XX is LED output 1 and YY is LED<br>output 2. Available options per output: 18, 20, 22, 25, 27, 30, 35, 40, 50, 57, 65.<br>E.g. "18-50" for 1800K on LED output 1 and 5000K on LED output 2. |

## Input characteristics

| Nominal input voltage range AC | 100 - 250V (PSE)           |
|--------------------------------|----------------------------|
| Maximum input current          | 0.7A @ 100V / 60Hz         |
|                                | 0.7A @ 120V / 60Hz         |
| Input frequency range          | 50 - 60Hz                  |
| Efficiency at full load        | 87%                        |
| Power factor at full load      | >0.9                       |
| THD at full load               | <20%                       |
| Maximum inrush current         | < 200mA²s @ 100V/ 60Hz     |
|                                | < 200mA²s @ 120V / 60Hz    |
|                                | < 200mA²s @ 250V / 50Hz    |
| Surge protection               | 2kV differential mode (DM) |
|                                | 2kV common mode (CM)       |
| Maximum standby power          | <0.5W                      |

#### **Output characteristics**

| Maximum LED output power              | 50W  |
|---------------------------------------|--|
| Number of LED outputs                 | 2  |
| Programmable LED output current range | 450 - 900mA  |
| LED output type                       | Programmable in 1mA increments within specified current range                              |
| LED output current tolerance          | +/- 5% at programmed LED output current  |
| LED output voltage range              | 21 - 42V   |
| Operating window                      | 50W max<br>50W max<br>60<br>45<br>40<br>45<br>40<br>45<br>40<br>42<br>45<br>40<br>42<br>45 |

#### **Environmental conditions**

| Operating ambient temperature (Ta) range    | -20 °C to +50 °C  |
|---|---|
| Maximum operating case temperature (Tc max) | 83 °C   |
| Lifetime                                    | 50000 hours at a maximum case temperature (Tc) of 76 °C |

#### **LED** driver protection

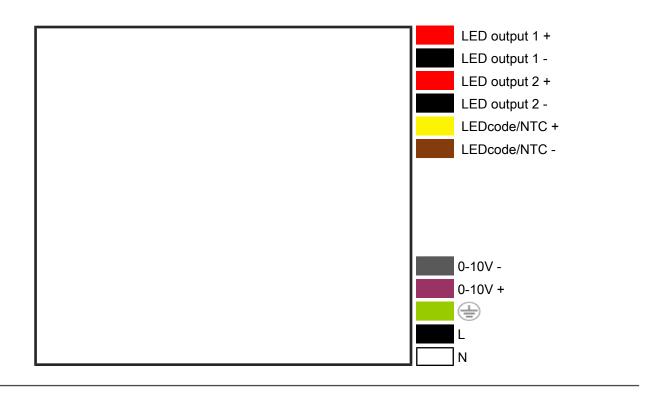

| LED output short circuit temperature exceeds increased again of internal temperature to increase, despited to the temperature temperature temperature temperature temperature temperature exceeds again of internal temperatur | urrent is decreased whenever the internal LED driver<br>eds factory preset temperature. The LED output current is<br>once the internal LED driver temperature drops below this<br>ure threshold. If the internal LED driver temperature continues<br>ite a decrease in output current, the LED driver will shut down.<br>urrent is cut off whenever the LED driver detects a short-<br>triver will attempt a restart every 400ms after a short-circuit is |
|--|---|
| circuit. The LED d   |   |
|  |   |
| its maximum rated  | ecreases the LED output current sequentially, until it reaches<br>d power, whenever a load that exceeds the LED driver's<br>ower is connected to the LED output.  |
|  | ill not yield any current if the polarity of the load on the LED<br>I. This situation will not damage the LED driver but may<br>load.   |
| LED protection   |   |
| connected to the o<br>the LEDs is then o<br>allowable tempera  | thermistor, which is placed on a PCB near the LEDs, can be<br>driver via the LEDcode/NTC terminals. The output current to<br>decreased by 75% whenever the NTC exceeds a maximum<br>ature, which is specified by the user in the FluxTool software.<br>temperature limit is set to 70 °C.   |
| Thermistor value 47kΩ  |   |
| Suitable thermistors Leaded: Vishay, P   | P/N 238164063473  |

Screw: Vishay, P/N NTCASCWE3473J

## LED driver mechanical details

| Length (L)                             | typical: 152.5 mm / 6 in   |
|--|----------------------------|
| Width (W)                              | typical: 76.2 mm / 3 in    |
| Height (H)                             | typical: 30.1 mm / 1.19 in |
| 3D files available on product web page | IGS                        |
| Weight                                 | 302 g                      |
| Mounting torque                        | Not to exceed 0.5Nm        |

## **Connector layout**

## Input wiring specifications

| Connector type                | push-in terminals         |
|-------------------------------|---------------------------|
| Connector supplier and series | Wago 250 series           |
| Wire type                     | solid or stranded copper  |
| Wire core cross section       | 0.5 - 1.5 mm² AWG 20 – 16 |
| Wire strip length             | 9.0 mm                    |

#### Certifications

| Safety  |   |
|---------|---|
| 1       | Risk of electrical shock. May result in serious injury or death. Disconnect power before servicing or installing.   |
| Ţ       | The LED driver may only be connected and installed by a qualified electrician.<br>All applicable regulations, legislation, and building codes must be observed.<br>Incorrect installation of the LED driver can cause irreparable damage to the LED<br>driver and the connected LEDs.                                   |
|         | Pay attention when connecting the LEDs: polarity reversal results in no light output and often damages the LEDs.  |
| <u></u> | LED drivers are designed and intended to operate LED loads only. Powering non-LED loads may push the LED driver outside its specified design limits and is, therefore, not covered by any warranty.   |
| j       | eldoLED products are designed to meet the performance specifications as<br>outlined at certain operating conditions in the data sheet. It is the responsibility<br>of the fixture manufacturer to test and validate the design and operation of the<br>system under expected and potential use cases, including faults. |
| (j)     | Please observe voltage drop over long cable lengths. Longer cable lengths increase EMI susceptibility.  |
| (j)     | Product renderings and dimensional drawings are generic for the housing type.<br>Product label, connector type and quantity may vary.   |
