

# Protect™ Automotive Mold Treatment: Purify your vehicles' interior

2. The blower fan pushes the mist into the evaporator core.

1. DWD2 Protect's™ fine mist is pulled into the ventilation system via recirculated air.

3. Protect™ mist is pushed through the heater core and through the air vents for full coverage.

## Gray Cap - Mold Fogger

1. Turn on A/C to the max setting and set it to recirculate air.
2. Shake well, and place the can in a central location within the vehicle. Press down on the actuator into the locking position and quickly exit, close windows and doors.
3. After the product has fully dispersed, Turn off the engine and keep doors and windows closed for 15 minutes. For best results, allow longer wait times.
4. Open windows and allow to ventilate for 30 minutes. Treatment complete!

## White Cap - Spray

1. Turn the fan on high and set it to fresh air.
2. Locate fresh air intake (usually identified by a plastic grille).
3. Shake can and hold approximately 3" away and spray liberally into the fresh air intake. This allows fresh air to pull the enzymatic mist into the ventilation system.
