

PROTECT HOME & COMMERCIAL APPLICATION GUIDE

Use natural, powerful plant enzymes to purify your environment

Protect Home & Commercial Fogger:

Protect Home & Commercial is a natural, non-toxic, enzymatic mold treatment formulated to treat contamination and associated odors. Typical applications on our 8 oz fogger cover 132 square feet or 1,320 cubic feet of surface area in a room. For example, a room measured at 11 feet wide by 12 feet long and 10 high would require one 8 oz can of Protect™ Home fogger. For larger areas, use our extra large 14 oz. Protect™ which can cover over 2,300 cubic feet.

General Fogging Directions:

1. Prepare area being treated by removing debris and wiping down surfaces with a cloth. Close windows and doors.
2. Shake well, place can in a central location of the area being treated.
3. Press down on actuator into lock position and quickly exit the area.
4. Wait 1-2 hours before entering, then open doors to ventilate. For best results, allow longer wait times.

Surface Spray Directions 32 oz:

If there is visible contamination in the area being treated, use our 32 oz Protect Multi Surface Treatment Spray bottle to saturate the area and let the product sit for 10 minutes before wiping clean.

Protect™ can be used on:

- bathroom • tubs • sinks • floors
- walls • drywalls • cinder block • walls
- hotel Rooms • RVs • Boats • Campers, etc.

The enzyme in Protect™ will penetrate any permeable surface such as drywall, carpeting, etc. This application will remove fungus, as well as disinfect and deodorize!

Multi-Surface Solution 1 Gallon:

Use our Protect™ ready to use multi-surface solution in a spray bottle or a fogging machine for extra-large applications such as hotels, gyms, warehouses, commercial buildings, etc.
