

American League Player Stats

1901 – 2019

By Brian Aldridge

pro-baseball-journal.com & chicagosportsjournal.com

Preface

Your book of **American League Statistics** is a year-by-year listing of batting and pitching leaders. While a singular statistic won't tell the whole story, it does give the reader a glimpse of the player's skill or how well (or poorly) the team performed. But baseball statistics do fascinate – just talk to a follower of **Fantasy Baseball**. These folks survey box scores, trends, weekly reports, injury lists, and sites where the next series is played. Members of the Society of American Baseball Research (**SABR**) take metrics to a deeper, wider level and much can be learned by what they find. Meanwhile, the rest of us just look at the daily box scores to see if our team won or lost and quickly scan who played well.

Example: Many stat lovers recognize the following 5 iconic numbers: 714, .366, 56, 2,130 and 61. While each represents a well-established ML record, only 2 of the 5 remain. **Babe Ruth's** record of 714 HRs was broken by Hank Aaron in 1974; **Ty Cobb's** .366 career batting average is still the highest among all batters; **Joe DiMaggio's** 56 game hitting streak has yet to be beaten; **Lou Gehrig's** 2,130 consecutive games were later eclipsed by **Cal Ripken**, and **Roger Maris's** 61 HRs was a ML record that lasted 27 years. By the way, all but Aaron starred in the American League.

Before the first pitch:

When the American League declared itself a major league in 1901, the National League was already 25 years old. From 1876-1900, the NL tinkered with rules (i.e. walks, strikeouts), increased the distance from home plate to the pitcher's mound twice, faced challenges from 3 other leagues, saw teams come and go, and from 1887 onward, had banned blacks from playing. When the AL and NL signed a peace agreement in 1903, more changes were to come.

When you page through this book and it's **NL History** counterpart, take note how baseball survived the 9-year Deadball period, competition from outlaw leagues, scandals, the Depression, and the Steroid Era. What is more, the sport thrived when blacks were finally allowed to re-enter in the late 1940s. Baseball carries its own magic (the speed of the fastball, the length of a HR, and fantastic plays on defense) and is aided by a long list of past and present stars – most of whom are listed (often!) in this book.

Dear Friends:

Pick a year: What was Ruth's best year: 1920, 1921, 1923 or 1927? Answer: 1923.

Pick your favorite player: Follow Cobb or Gehrig; Bob Feller, Joe DiMaggio, Ted Williams, Whitey Ford, Luis Tiant, Jim Palmer, Cal Ripken, Frank Thomas, Mike Trout, Miguel Cabrera or Jose Altuve. Note how many others you recall.

Pick a favorite stat:

- Who were the home-run leaders that pre-dated Babe Ruth? Who ended up 2nd to Ruth?
Note the disparity between the two!
- Find out who came close to achieving the Triple Crown.

Note trends:

- Not only did HRs rise and fall; stolen bases and batting averages did the same (compare the top batting averages in late 1920s with those of the late 1960s).
- When did stolen bases fall only to rise again?
- Pitch counts? What pitch counts! Note Innings Pitched from the early 1900s, to the 1960s, the 1990s, to 2018.

Acknowledgments & How to Use This Book

Acknowledgments:

My dad was astonished when at an early age I could recall HR leaders, pitchers who won 30+ games in a season, or batters who hit above .400. Although he passed away in late 1982, I dedicate this book to him. I can still hear his voice and see his joy when we talked sports.

Primary sites used: baseball-reference.com, *Sports Illustrated* magazine, Baseball Digest, Chicago Tribune, Daily Herald, and SABR journals.

For a more detailed list of sources, see my bibliography on the **pro-baseball-journal.com** site.

Terms: **2B** (doubles) **3B** (triples) **SA** (slugging average: total bases/at-bats)

Extra Base Hits (doubles, triples, and HRs)

WAR (Wins Above Replacement) **WAR (H)** = Hitters **WAR (P)** = Pitchers
