crafted from experience

Identify your leather

It is important to know what kind of leather your boots are because this might determine how you care for your boots.

Please note: Some brands might call the same leather by different names. For example, Kingsley calls their patent leather "Roma", and another brand might just call the same leather "Shiny".

How do I identify my leather?

- Custom Boot: Refer to your purchase documents!
- Stock Boots: Look at the listing on our website (we leave almost all boots once sold in our "Lookbook"
- 🖞 Still Unsure? Email us: thedistinguishedrider@gmail.com

Leather Types

- **Full Grain/Grain:** An extremely hearty leather! TDR loves full grain leather (EX: Kingsley calls this Paxson) for trainers or people who are hard on their boots because of its durability.
- **Waterproof:** A waterproof leather, (EX: Kingsley calls this Gaucho, DeNiro calls this WRAT) is another great, hardy option.
- Matte: Your standard natural leather not polished or shiny leather. This comes in a large variety of colors from your typical black to colors like lilac and turquoise. (EX: Kingsley calls this "Nature" or "Aspen" leather)
- Polished/Patent: "Shiny" leather patent has more of a glass-like finish than polished. This leather is prone to scratches and can be hard to break in. It is very popular for a fancy clinic or show boot! (EX: Kingsley calls this "Roma" for patent, and "Uragano" for polished, DeNiro calls polished "Brushed")
- **Suede:** Great for fashion looks, or boots worn only for clinics and/or shows. Some brands have waterproof suede options. Like your nature leather, this comes in a variety of colors from black to various shades of blue and more!
- **Textile/Fabric:** A great way to add a bit of dimension or flare to a boot! This includes shiny dots, braided leathers, tooling, animal prints, and more

Choose your products

Now that you have identified what kind of leather you have, you can determine what products you need to keep your boots clean and looking great!

 - 1 Christian Lowe Liquid Saddle Soap
 - 175g Christian Lowe Leather Balm
 - 1 Christian Lowe Zipper glide
 - 1 Small cleaning brush

Purchase your complete leather care kit now!

Leather Cleaning

- 1. Brush off any excess dirt and dust with a clean brush.
- 2. Use a warm, slightly damp cloth to clean off any build up.
- 3. If you experience any excessive build up, use **Christian Lowe Leather Cleaner**. Be sure to WIPE OFF the grimy layer when you are done cleaning.

For dyed/colored leathers (not Waterproof/Gaucho): please note that, to lock in the color of the leather, you *must* use **Christian Lowe Clear Boot Polish. This acts as a wax seal and a waterproofer. We recommend you do this prior to riding.

Boot Care Tips

- Do not put your boots away if they are moist! Dry them first.
- Store your boots in a **temperature-controlled environment**.

To retain the shape of the boot and prevent them from flopping over, **use cedar boot and shoe trees**. Cedar trees will suck the moisture out of the boots, and cedar foot trees will retain the shape of the foot and ankle of the boot. Support small businesses by purchasing these from your local cobbler or shoe store :)

Keep your zippers clean and lubricated! We HIGHLY suggest using
Christian Lowe Zipper Glide regularly. A grain of sand can misalign the
teeth and break the zipper. Use a toothbrush to clean the zipper after
riding. If the zipper feels like it is getting stuck, lubricate using any brand
of zipper lubricant. NEVER force a zipper!

Be nice to your boots. If you take care of them, they will take care of you!

Leather Specific Care

∫ Full Grain/Grain/Paxson

• Due to the small bumps and grooves in this leather, **Christian Lowe Liquid Saddle Soap** is preferred for cleaning.

Waterproof/Gaucho

- Use **Christian Lowe Leather Balm** to hydrate the leather every so often.
- Be sure to re-treat your leather with a waterproofer every few months.
- Do **NOT** polish.

Matte/Natural/Nature

- Use **Christian Lowe Leather Balm** to hydrate the leather every so often.
- If the boot starts to lose its pigment or you want to shine it up for a special occasion, use your **Christian Lowe Boot Polish** to restore the color and luster of the leather.

Patent/Polished/Shiny

- Be gentle with these leathers! They scratch easily and do not wear well.
- Do NOT expose these leathers to the sun for extended periods of time.
- Use Christian Lowe Patent Cleaner to keep clean and shiny!

Suede

- Suede leather is NOT meant for daily use! It is very delicate and attracts dirt and moisture.
- Keep your suede boots dry AT ALL TIMES!
- Use a clean brush to wipe off any dirt or dust.
- Be sure to treat your suede with a waterproofer every few months.
