

CS900

Big Button Cell Phone

The CS900 is a great looking phone that can stop those annoying nuisance robocalls. This easy to use flip phone has a Caller ID display on the outside, a large 2.8" screen on the inside and an integrated SOS Emergency assist button on the rear.

CS900 has a built-in Black and White list function. The Black List function allows users to block nuisance callers at the touch of a button. The White List function can be programmed to allow only certain numbers through.

The CS900 can send an SMS text message saying "Emergency, call me" followed by a phone call to all preset emergency contacts on a continuous loop until the call is answered. This specially designed feature gives consumers the confidence to remain independent.
