What to do before my Shed arrives?

- Become familiar with this assembly manual and determine if you can complete the project yourself or will require a professional contractor.

- One helper is recommended to assist in constructing your shed. It generally takes two people over two days to assemble a shed. If you're hiring a contractor, their rate should be in line with that duration of work.

- Clear the construction area and ensure a clear pathway for delivery when the freight company arrives. Remove all debris: roots, grass, rocks, etc.

- Excavate the site. Contact your local utilities company to ensure there are no gas or electric lines buried in the area before digging.

- Decide on the type of foundation you will be using:
 - Concrete slab, or
 - 4-6 inches of crushed gravel with paver stones or 4x4 stringers.

You can find the footprint for your shed on Page 3 of your Assembly Manual.

- If doing the assembly yourself, have all the necessary tools ready to go and in working condition. A list of required tools can be found after the parts list.

Tip - once satisfied, cleat each corner temporarily with some scrap wood (not included) to keep walls from moving.

3. Rafter & Roof Section

37. Rafters need to be assembled before laying of roof. There will be 7 completed rafters when pieces are attached together. There are 4 pieces of "2x4" for each rafter. **2 pcs of 47" Length & 2 pcs of 72" Length.** When attached together, total length of rafter will be 119". On solid ground, locate 2 of **3A - Rafter Sections -Short** and 2 of **3B - Rafter Sections -Long** and position as illustrated above. Starting on one side, line ends and sides up even. Use clamp to hold in position. Attach together with **10 - 2 1/2" Screws.**

38. Complete attachments of all 7 Rafters now.

Hint - Occasionally wood can twist, use clamps to straighten as best you can before screwing.

Important
 You will need two large ladders (7 ft or 8ft high) during most of the remaining steps of this manual.

39. Before attaching rafters measure between gable wall framing. Make sure distance between inside framings is 131 1/2". Be sure to evenly space rafters on framing before attaching in **Step 40.**

40. Position Rafter on gable wall framing. Locate **3F - Rafter Overhang Spacer** and place underneath front of rafter flush against upper wall plate to determine front rafter overhang position. Inside of rafter should sit flush with inside of gable wall framing. Clamp in position but don't attach yet. Position opposite outside rafter as described and clamp in place as well.

41. Before attaching, measure rafter spacing to confirm 131 1/2" and make adjustments as necessary. With Rafter correctly positioned, attach to side gable wall framing with **8 - 2" Screws**. Screw up from below the framing into rafter. Position other outside rafter as above. Inside to inside measurement of rafters should be 131 1/2".

44. Place completed Rafter Spacer Jig on top of the roof rafters in the front. Position interior rafters so they fit in jig spacers as shown to the right. Use the Front Rafter Overhang Spacer to correctly position rafters from front to rear.

Expert Advice - prior to attaching rafters, refer to **Step 36** and check that walls are still level, square and plumb.

45. With Rafter correctly positioned using the overhang spacer, attach a **90° Metal Bracket** to each side of rafter and to the front upper wall top plate. Use **4 - 1 1/4" Screws** per bracket. Proceed to next rafter. Use overhang spacer to position rafters correctly front to back and attach with two 90° brackets as described. Complete all remaining front interior rafter attachments.

Congratulations on assembling your 12x8 Studio Garden Shed!

Note: Our Sheds are shipped as unfinished products. If exposed to the elements, the western red cedar lumber will weather to a silvery-gray color. If you prefer to keep the cedar lumber looking closer to the original color, we suggest that you treat the wood with a good oil base wood stain. You may also wish to paint your new shed rather than stain it. In both cases we recommend that you consult with a paint and stain dealer in your area for their recommendations.

We hope your experience assembling your 12x8 Studio Garden Shed has been both positive and rewarding.
