Rendimiento de

4 a 5m²
Por cada saco de

20 kg

Pasos para la correcta instalación

Aquí le presentamos las generalidades de nuestros adhesivos, así como las recomendaciones para su correcta aplicación. Para información más específica recomendamos leer la etiqueta del producto a utilizar.

Recomendaciones:

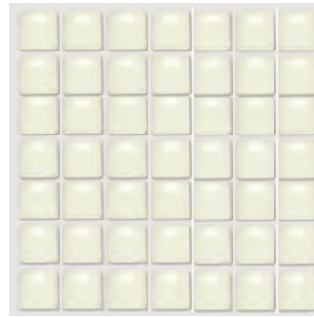

1. No agregue más agua al producto. Al mezclar, pudiera parecer que está seco, sólo siga revolviendo con el mezclador eléctrico y verá como obtiene una pasta cremosa, sin grumos y de fácil manejo.
2. Al usar una llana dentada de 8 o 10 mm, logrará esparcir la cantidad correcta para pegar y juntar en una sola operación su mosaico vítreo.
3. Mezcle constantemente el adhesivo preparado para evitar que se forme una película superficial. De ser así, sólo mezcle nuevamente para tener el adhesivo listo al uso.
5. Aplique en espacios reducidos, máximo de 1 o 2 metros a la vez.
6. Lea las instrucciones al reverso del saco.
