

THE TRAVELCARD

Thank you for your purchase of The TravelCard, the ultra-slim smartphone charger that fits in a wallet. You will get 35-45% back-up capacity for your phone.

Here are the basic operating instructions:

The TravelCard is shipped at 80% capacity. Before using it to charge your phone, connect the built-in USB charging cable to a computer port or wall outlet.

The TravelCard takes 1 hour to 1 and 1/2 hours to fully charge. When fully charged the blue light will go out.

Then, when plugged into your phone and the power button is pushed, the light will go from blue to amber to flashing amber (almost out of juice), and it's time to recharge the TravelCard.

The power button is not an "on-off" button. You push it when charging your phone. If it accidentally gets turned on when in your wallet or purse or pocket, it will go off automatically.

We hope you enjoy using The TravelCard as much as we enjoyed developing it.
