Choose the Time Zone according to your current location. Make sure you choose the correct Time Zone.

Version

Check camera firmware version.

GPS Function

The CE56 comes with GPS function and external GPS module. With the GPS module connected, the CE56 will release several additional functions: Track Logger / Speed Display / Time Sync

Track Logger:

With the GPS module connected and GPS function on, the CE56 camera will record real time GPS coordinate in the video file, so you can playback the driving path as well as the video.

(The GPS playback needs customized player “Dash Go”, for windows operating system only. Please download the "Dash Go" software from our official website " www.toguard.cc" like the picture shows below.)

Speed Display:

Based on the GPS location changes in certain time and average speed of a certain time period, the camera will calculate current moving speed and display it on screen for your reference.

NOTICE :

The speed displayed is calculated based on the average speed of a certain time period before that. There might be certain error under low speed. It's for reference only.

Time Sync:

With GPS module connected, the camera will automatically synchronise time when GPS signal is strong and GPS located successfully.

(Time Sync function requires correct Time Zone setup to work, please make sure you setup the right time zone.)
