10. **Audio output:** Select audio output mode

A. Apple CarPlay

As shown in the figure, click the [Apple CarPlay] button to enter the Apple CarPlay. Turn on the Wi-Fi and Bluetooth of the mobile phone first, then as shown in the figure below, select the [Apple CarPlay] option, click the [BT Manage] option of the interface, connect Bluetooth with the phone, you can open the application. When the machine is powered on, it will try to automatically connect to the last connected phone.

(Turn off your phone's Wi-Fi to disconnect, Apple CarPlay option only supports iPhone phones, Android phone please select [Android auto] option)

(The specific connection method is as follows)

1.Open Carplay

2. Turn on the Bluetooth and WiFi switch on the mobile phone

3. Find the t86 xxxxx device name in other devices, Use CarPlay

4. Connection successful

Tips: Hey, Siri, wake up your phone, listen to music, make phone calls, navigate, check the weather, etc. through your device

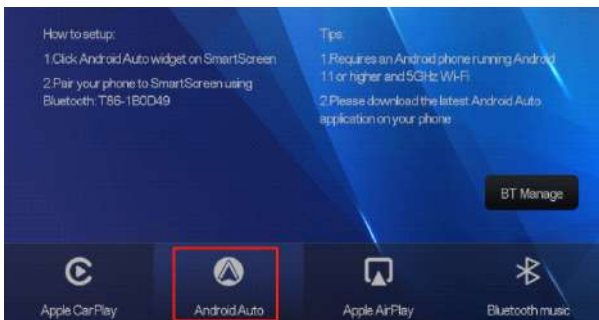

B. Android Auto

As shown in the figure, click the [Android Auto] button to enter the Android auto. Turn on the Wi-Fi and Bluetooth of the mobile phone first, then as shown in the figure below, select the [Android auto] option, click the [BT Manage] option of the interface, connect Bluetooth with the phone, you can open the application. When the machine is powered on, it will try to automatically connect to the last connected phone.

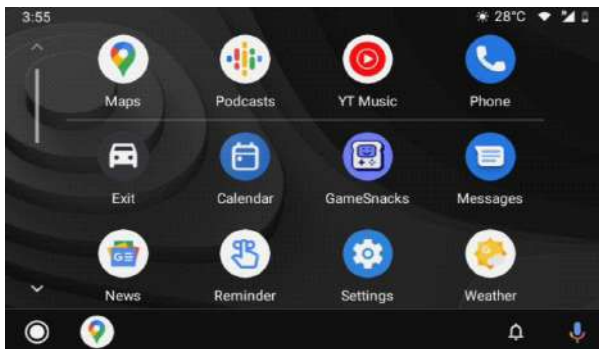

(Turn off your phone's Wi-Fi to disconnect)

1. Open Android Auto

- 2.To use Android Auto, Google Pixels phone needs to Android 8.0 or above.
- 3.For Android phones from other brand, the system needs to be Android 11 or above.

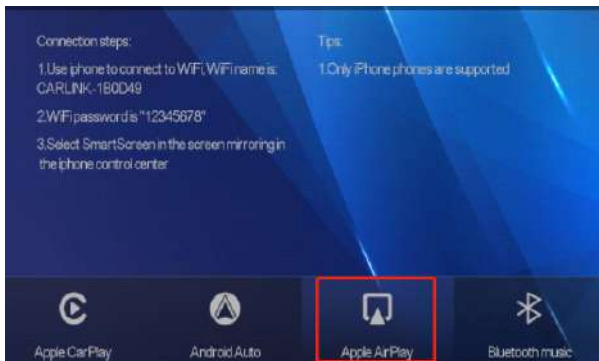

4. After connecting the Bluetooth device, it will automatically connect to the WiFi, please do not manually connect to the WiFi device again.

Note: Some Android phones may have wireless connection problems because different brands and system versions. So we offer wired connection for Android phone

Method: There has a usb port on the car charger cable, you can connect your Android phone to the usb port by your original phone data cable

C. AirPlay

Airplay supports transfer video, audio and pictures from iPhone to carplay by WiFi function.

Steps:

1. Require your iPhone connect to Carplay's WiFi
2. Select SmartScreen in Screen Mirroring in the iPhone Control Center

Note: Supports iPhone phones only

D. Bluetooth Music

You can find Bluetooth Music by clicking the button Apple CarPlay or Android Auto. Turn on Bluetooth of the mobile phone first, and select [Bluetooth Music] option. Click the [BT Manage] option on the interface to connect Bluetooth to the mobile phone and start playing music.

The buttons correspond to Last, Play / Pause and Next, respectively.

Click on the Lyrics button [] to display the lyrics.

(Some mobile music player apps do not support displaying lyrics)

E. Bluetooth

As shown in the figure above, click the Bluetooth button [] to switch on the device after entering the Bluetooth interface.

The page will display the device name, such as: T86-1xxxxx, and click the Modify button [] to modify the Bluetooth name of the device.

Select the device name with Bluetooth, and the remote device name of the phone will appear after successfully connecting.

At this time, you can play mobile phone music and other functions.
After connecting to Bluetooth, you can use the call function:

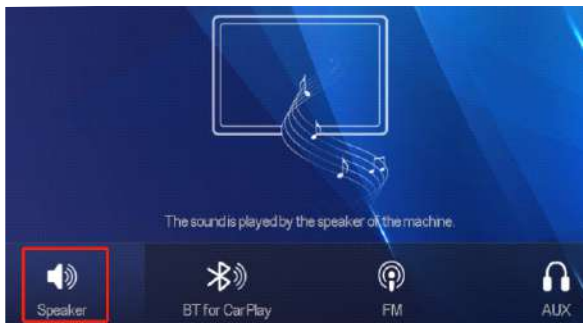

Click the Disconnect button [] to actively disconnect the Bluetooth.

F.Audio output

Audio output

1.Speaker output

2.BT output:

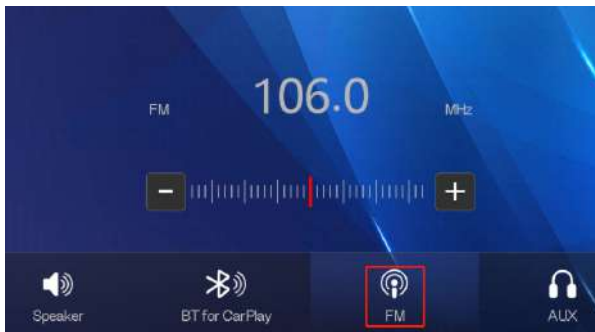

3.FM output

As shown in the figure, click the [FM Transmit] button to enter the FM Transmit function: it can emit the sound of the equipment, receive it with the original car radio, and play it through the original car horn, enjoying the original car level. When you turn on the FM Transmit option, the monitor will no longer emit any sound. At this time, you need to turn off the FM Transmit or match the sound to the car's builtin stereo to have sound.

(Not using the original power cord will cause the FM Transmit signal to deteriorate or the function cannot be used.)

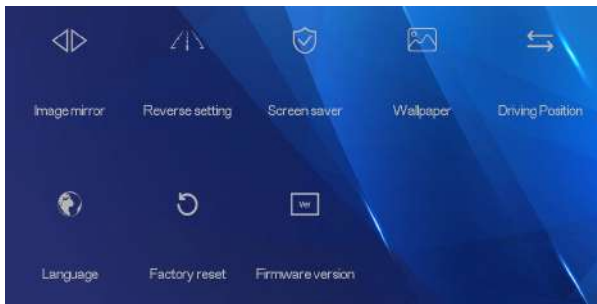

1. Selects the frequency band to be emitted, for example, the FM 106.0 MHz.
 2. Car radio also adjusts the acceptance band to FM 106.0 MHz.
 3. Car radio can connect to the FM Transmit signal of the upper system.
- After the FM launch connection is successful, all sounds will be sent to the original car speaker for play.

(Recommended FM: 100-108MHz)

4.AUX output:

FAQ:

1. Because the output current is unstable when the car starting, please turn off the FM before stopping the car, otherwise the FM will make noise when you starting the car again.
2. When you use the FM to connect the carplay, please don't use the same frequency as the broadcast, otherwise the carplay will be frequency bumping and no sound. you can use the AUX cable to connect the carplay, which can effectively solve this problem.
3. Some Android phones may have wireless connection problems because different brands and system versions. So we offer wired connection for Android phone.
Method: There has a usb port on the car charger cable, you can connect your Android phone to the usb port by your original phone data cable.
5. Before connecting again, please turn on Bluetooth and WIFI, the system will auto connection your mobile phone.
6. Please according our suggested to connect the power circuit, and avoid interference when the machine is started.
