

# THERE'S ONLY ONE NUMBER 1

## RUBBER BASE PLUS

Rubber Base Plus has always been and continues to be the most widely used small offset press printing ink around the world. It is truly an economical ink since it stays open on the press for days at a time eliminating the need and time of costly wash-ups and it will not skin in the can. It is highly pigmented resulting in brilliant colours and more impressions from each gram. It sets rapidly on uncoated papers making it the ideal ink for quick turn-a-round. Rubber Base Plus runs extremely well on any small to mid-sized press with an integrated or conventional dampening system.

It is compatible with all plate systems especially electrostatic and metal. It is not intended for use on coated or hard surfaced stocks without the addition of driers.

In addition to its ease of use, Rubber Base Plus is also excellent for thermography, business forms, envelopes and all other letterpress applications where it performs perfectly.

Rubber Base Plus is available in a dense all purpose universal black, process colours as well as the 15 PANTONE® Basic colours. Packaging is in lock top 450 gram and 1 kg metal cans.

# RUBBER BASE PLUS

A press-ready small offset press printing ink known for its easy working properties. Sets and dries very fast on uncoated papers making it the ideal ink for quick back-ups, cutting or folding. Economical because it produces more copies, stays open on the press and does not skin in the can.

Rubber Base Plus runs extremely well on small to mid-sized presses with both integrated and conventional dampening systems. It is compatible with all plate systems especially metal and electrostatic. It is not intended for use on coated or hard surfaced stocks without the addition of driers.

In addition to its ease of use, Rubber Base Plus is also excellent for thermography, forms, envelopes and letter-press applications where it performs perfectly.
