PLASTIC FREE COLLECTION 2023

**The italian way of sustainability**

# RIPPOTAI

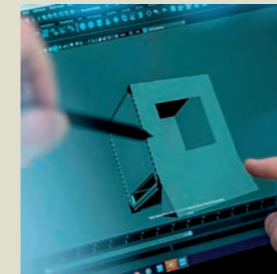

## An eco-design choice.

We create, design and produce home and office decor items and gift ideas in recyclable, eco-friendly or renewable materials. Our products are eco-friendly, reusable, recyclable and designed in our Italian workshop following the eco-design philosophy with sustainable and certified materials such as FSC cardboard and GreenGuard inks, with an innovative glueless stacking system.

We are a Benefit Company trying to achieve fundamental goals in terms of inclusiveness, equity and sustainability and we do so by giving lots of importance to individuals, not just profit.

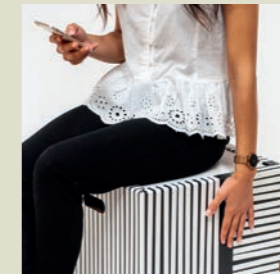

Let's make the change. **Together.**

## Our core values

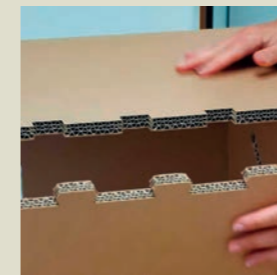

### Re-use

We design furnishing accessories designed to be used several times and to have a long life. The products are designed to be disassembled and reused

### Inclusivity

We believe that there are no differences but only excellences to always give the right voice.

### Innovation

Our products are assembled with an ingenious system interlocking without the use of glues. Their disposal must respect the principles of the circular economy.

### Made in Italy Design

Design and production made in Italy only with certified eco-friendly materials.

& Seed Housing

26 Eco-friendly placemats

## 28 Eco-friendly packaging

- WavePotai, our packaging turning into a lampshade
- Our packaging for Christmas panettone

32 Eco-design bottle holder

# Solidarity

For every single sale made by Rippotai it is possible to combine one donation to support needy cooperatives and associations that help deaf children, disabled people or who dedicate their efforts to safeguarding the environment and animals.

They are drops in an ocean but a concrete help for those who are often just a volunteer.

**Together with you and your customers we can do much more. Let's talk about it!**

# The plantable pencil. A small action to grow a great cause

Plantable pencil with chamomile seeds is a zero-waste product. You use it up and consume it all by sharpening it, every time you do its shavings can be planted to have chamomile plants. No trees were cut down to make it, but recycled paper with chamomile and wormwood seeds (Those are among

the smallest type of seeds, so that the cutting technology we use will not damage them). A real turning point for your circular economy! It can be customized for special occasions, meetings, ceremonies, graduations, weddings...

## Eco-friendly decorations.

No matter what they are, they will always turn into beautiful flowers

Our multitasking baubles can be used in so many different ways!

Perfect as Christmas tree decorations, as original Christmas place cards or coasters, as tickets to close gift packages... Find fancy ways to use them!

Our ecological Christmas baubles are made of seed paper and if planted they will turn into flowering plants for pollinating insects.

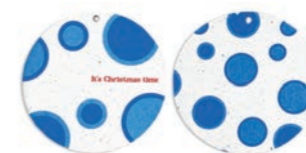

These baubles are the soul of an eco-sustainable Christmas!

## Christmas tree.

# Christmas' main character: an evergreen for your shop, your office, your home

Our Christmas trees are fully sustainable and made in Italy. They enrich homes, shops or company environments with the "total green" trend.

Once holidays are over, our decorations are 100% reusable or recyclable. They

can be disassembled as they are built up without glue, and are easy to store: once disassembled they take up very little space.

Non-standard customizations and special request available.

# Seedbomb & SeedHousing. Small blooming gifts

Eco-friendly and innovative, our seed bombs are colorful balls with certified European seeds.

Once the ball is thrown into the ground, the seeds it contains will soon become plants. The packaging, customizable, can be reused thanks to the reuse project with which it was conceived:

you can use it to wrap headphones, keychains, ornaments... You can also hang them on the Christmas tree or use them as a seal for your presents!

An original and innovative gift idea for corporate gadgets and events, anniversaries and favors.

Small steps towards a greener planet.
