PLASTIC FREE COLLECTION 2023

The italian way of sustainability

RIPPOTAI

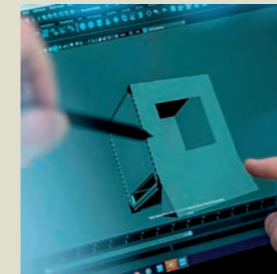

An eco-design choice.

We create, design and produce home and office decor items and gift ideas in recyclable, eco-friendly or renewable materials. Our products are eco-friendly, reusable, recyclable and designed in our Italian workshop following the eco-design philosophy with sustainable and certified materials such as FSC cardboard and GreenGuard inks, with an innovative glueless stacking system.

We are a Benefit Company trying to achieve fundamental goals in terms of inclusiveness, equity and sustainability and we do so by giving lots of importance to individuals, not just profit.

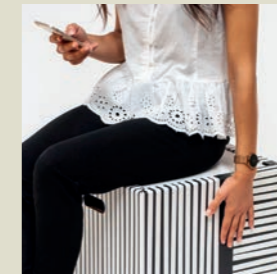

Let's make the change. **Together.**

Our core values

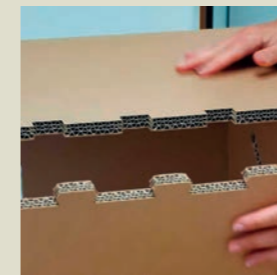

Re-use

We design furnishing accessories designed to be used several times and to have a long life. The products are designed to be disassembled and reused

Inclusivity

We believe that there are no differences but only excellences to always give the right voice.

Innovation

Our products are assembled with an ingenious system interlocking without the use of glues. Their disposal must respect the principles of the circular economy.

Made in Italy Design

Design and production made in Italy only with certified eco-friendly materials.

34 Sustainable fabrics

- Bags and accessories
- Eco-friendly aprons, tea towels and beach towels
- Eco-friendly Shopper

42 Bamboo speakers

44 Pens with recycled and biodegradable plastic

46 Porcelain cups

Solidarity

For every single sale made by Rippotai it is possible to combine one donation to support needy cooperatives and associations that help deaf children, disabled people or who dedicate their efforts to safeguarding the environment and animals.

They are drops in an ocean but a concrete help for those who are often just a volunteer.

Together with you and your customers we can do much more. Let's talk about it!

Plantable pencil. Raise wildflowers from your words!

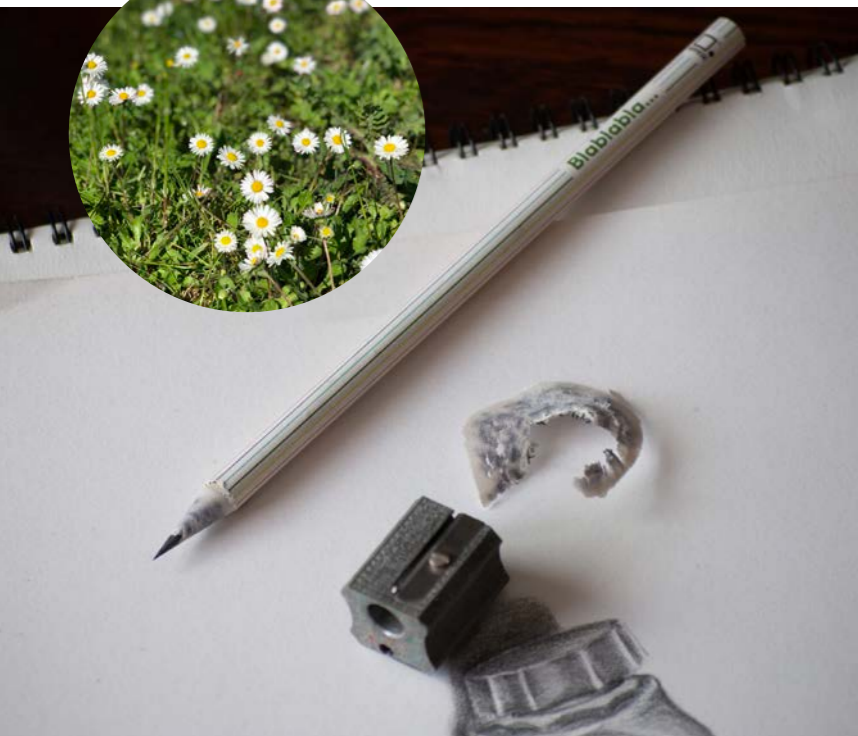

Plantable pencil with chamomile seeds is a zero-waste product. You use it up and consume it all by sharpening it, every time you do its shavings can be planted to have chamomile plants.

No trees were cut down to make it, but recycled paper with chamomile and wormwood seeds, (those are among

the smallest type of seeds, so that the cutting technology we use will not damage them). A real turning point for your circular economy!

It can be customized for special occasions, meetings, ceremonies, graduations, weddings...

Seedbomb & SeedHousing. Blossoming gifts ideas

Ecological and innovative, our seed bombs are colorful balls with certified European seeds.

Once the ball is thrown into the ground, the seeds it contains will soon become plants. The packaging, customizable, can be reused thanks to the reuse project with which it was conceived: to wrap headphones, key rings, ornaments...

An original and innovative gift idea for corporate gadgets and events, anniversaries and favors.

Take with us a small step towards a greener planet.

A sustainable fabric.

Starting from sea plastic... A new yarn is (re)born

Our brand-new proposal for our sustainable and customizable linen is characterized by SEAQUAL® YARN, an innovative fabric that frees our oceans from plastic waste.

By choosing these products you support the ONG fishermen's local operators that pick up plastic waste from oceans, beaches or rivers and allow use to use it as raw material for our creations.

SEAQUAL® YARN contains 10% approx. of SEAQUAL® MARINE PLASTIC (from sea plastic waste), the remaining 90% is made of Post-consumer PET from terrestrial sources.
