The italian way of sustainability

RIPPOTAI

An eco-design choice.

We create, design and produce home and office decor items and gift ideas in recyclable, eco-friendly or renewable materials. Our products are eco-friendly, reusable, recyclable and designed in our Italian workshop following the eco-design philosophy with sustainable and certified materials such as FSC cardboard and GreenGuard inks, with an innovative glueless stacking system.

We are a Benefit Company trying to achieve fundamental goals in terms of inclusiveness, equity and sustainability and we do so by giving lots of importance to individuals, not just profit.

Let's make the change. **Together.**

Our core values

Re-use

We design furnishing accessories designed to be used several times and to have a long life. The products are designed to be disassembled and reused

Inclusivity

We believe that there are no differences but only excellences to always give the right voice.

Innovation

Our products are assembled with an ingenious system interlocking without the use of glues. Their disposal must respect the principles of the circular economy.

Made in Italy Design

Design and production made in Italy only with certified eco-friendly materials.

- 22 Menus and cards made with seed paper

Solidarity

For every single sale made by Rippotai it is possible to combine one donation to support needy cooperatives and associations that help deaf children, disabled people or who dedicate their efforts to safeguarding the environment and animals.

They are drops in an ocean but a concrete help for those who are often just a volunteer.

Together with you and your customers we can do much more. Let's talk about it!

WavePotai.

An eco-friendly packaging to light up your gifts

The original sustainable packaging that turns into a lampshade.

It is made of FSC certified cardboard with visible waves and can be customized with your brand.

Use it to hold your products or hang it as a chandelier to decorate your rooms. It is an ecological gift idea that you can put on sale in your commercial showcase as well.

The mark of responsible forestry

A sustainable fabric.

Starting from sea plastic... A new yarn is (re)born

Our brand-new proposal for our sustainable and customizable linen is characterized by SEAQUAL® YARN, an innovative tissue that frees our oceans from plastic waste.

By choosing these products you support the ONG fishermen's local operators that pick up plastic waste from oceans, beaches or rivers and allow use to use it as raw material for our creations.

SEAQUAL® YARN contains 10% approx. of SEAQUAL® MARINE PLASTIC (from sea plastic waste), the remaining 90% is made of Post-consumer PET from terrestrial sources.
