

GasLab Plus Carbon Monoxide Detector

- Large LCD display of CO, %RH and temperature
- Audible high-CO level safety alarm
- Data logging with 16Gb SD card
- LCD back light for easy readability in the dark
- Long-life Li-ion rechargeable batteries

The GasLab Plus Carbon Monoxide Detector is designed to protect people who work near combustion or high CO concentrations in enclosed areas.

CO alarms are critical in manufacturing, automotive, marine, aviation, industrial or chemical applications, or anywhere CO is produced at potentially dangerous levels (> 50 ppm).

The GasLab Plus CO Detector has an audible alarm, LCD backlight, and a built-in data logger.

Best of all, the GasLab Plus CM-503 is easy to use, and the alarm is ready to protect your customers or employees.

Applications

- Indoor Garages
- Marine
- Industrial
- Aviation
- Scientific

CM-503

Specifications

Measurement Range

- 0~1,000ppm
(5,001~9,999ppm over range)

Accuracy

- $\pm 5\% \sim \pm 10\%$

Display Resolution

- 1ppm

Temperature

- 0-50°C

Operating Conditions

- 0~40°C (32~104°F), 0~95% RH, non-condensing, with lithium-ion batteries

Power Supply:

- Rechargeable Li-ion batteries
