### Product Information

### Installation Instructions

1. Remove the front diffuser from the base by removing the four diffuser fixing screws and pulling away from the base tray.
2. Loosen but do not remove the gear tray retaining screws. Adjust the position of the gear tray to align the hole in the keyhole slots with the retaining screws. Remove the gear tray from the base.
3. Select a suitable cable entry point provided or drill out a hole in the base.
4. Position and fix the base to a suitable solid surface using the screws provided. Feed the supply cable into the luminaire through a previously selected hole ensuring that the aperture is smooth or use a grommet where possible. Note: If using knock out hole on the side apply silicon to the joint or use IP65 cable gland.
5. Ensure that the luminaire has a continuous live supply to L (Unswitch live). The " Maintained" emergency luminaire can be "switched" via connection Ls (Switched Supply). Ensure battery cells cable is connected.
6. Plug in battery, then set colour temperature switch: 1 ON switch 2 OFF switch = 3000K ; 1 ON switch 2 ON switch = 4000K; 1 OFF switch 2 ON switch = 5700K.
7. Dress any cables away from the edges of the luminaire and re-align the gear tray. Refit the gear tray using the retaining screws.
8. Re-fit the front diffuser to the base using the four diffuser fixing screws. Restore the mains power supply, switch on and test for satisfactory operation.
