## Installation Instructions

1. Ensures mains power supply has been switched off.

2. Remove from packaging & check the product carefully to ensure there is no damage. DO NOT knock or stack highbays once removing from packaging.

3. This lumlnaire is designed to be installed In suspen sion from the ceillng by means of a chain or thick cable that can withstand the weight of this. Screw the M10 hook on the packaging to the luminalre as shown in the image below.

4. Install the coarse wire or cable to the ceiling by screwing it or using a suspension kit for ceiling fixture installations. Check that the fixing is correct before connecting the wiring. If the luminaire is held securely, proceed with the connection of the luminaire to the power supply.

5. Check that the supply voltage is correct and connect the power cables of the correct terminals or as per your local colour code.

6. To adjust the wattage or colour temperature you can access this via the rubber bung that is on the top part of the highbay. For wattage, you have three switch selections to pick from: Low (120W ), Mid (160W) , High (200W). To change the colour temperature, you select the following switch options to select the desired colour temperature: A: 4000K, A+B: 5000K, B: 6000K.

**Note - LoADJ dial is for manufacturing purposes only, any tampering will void the warranty**
