

### ***Filter Replacement***

Please check the filter condition regularly and change it every 6 months.

1. Screw out the purifier base.

2. Remove the old filter and install the new one.

## **V. TROUBLE SHOOTING**

### **Q: Why doesn't my purifier work after it is turned on?**

A: Please confirm whether the power cord is connected normally.

### **Q: The purifier has abnormal sound or smell during operation. How to solve the problem?**

A: Please shut it down and unplug the power plug immediately.

### **Q: How to deal with the water in the purifier?**

A: Please shut down the purifier immediately and unplug the power plug. Carefully pour out the internal water, and dry it in the ventilation place for more than 24 hours.

If it still can't work normally, please contact our customer service or ask the professional to handle it.

## **Congratulations!**

Now you can start enjoying water purified by  
SimPure® Car Air Purifier-HC3

### Limited Warranty

The warranties set forth herein are the only warranties made by SimPure in connection with the product. SimPure cannot and does not make any implied or express warranties with respect to the product, and disclaims all other warranties, including, but not limited to, any warranty of merchantability or fitness for a particular purpose. Products sold by SimPure are sold only to the specification specifically set forth by SimPure in writing. Other than the limited product warranty set forth herein, SimPure makes no other warranties, express or implied. SimPure's sole obligation under this warranty shall be repaired or replacement of a non-conforming product or parts of the product, or at the option of SimPure, return of the product and a refund of the purchase price. Buyer assumes all risk whatsoever as to the result of the use of the product purchased, whether used singularly or in combination with any other products or substances.

### Warning

When using electrical products, basic safety precautions should be followed to avoid physical injury to you or others, or damage to the product or other property. Failure to follow basic precautions listed below could result in serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards.

- ⊘ This product is not a toy and is not intended for use by children.
- ⊘ Do not immerse product or expose product to any form of liquid.
- ⊘ Do not remove, replace, repair or tamper with the originally supplied adaptor.
- ⊘ Do not expose your product to excessive heat or humidity, as this can cause damage to its components.
- ⊘ Always insert or remove plug from the outlet by grabbing the plug by hand. Do not pull on the electrical cord.

## II. PURIFIER INSTALLATION

1. Put the USB in the car charger outlet.
2. Put the DC plug in the car air purifier.
3. Put the Car charger in the car.

Always place the car purifier on a stable, horizontal, and level surface.

For optimum purification performance, close the car and windows.

## II. PURIFIER INSTALLATION

### Multiple Application Scenarios

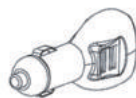

Figure 1

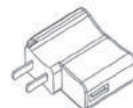

Figure 2

- Please use USB 5V input voltage.
- You can choose the original car (Fig.1) or USB adapter (Fig.2).
- 110V and 220V are both available.

### Start Up the Purifier

1. Press the power button once to turn on the purifier.
2. When the purifier start working, it works on the high speed, and the LED indicator light keeps lightening in green color.
3. Press the power button again, the car purifier operates on the low speed.
4. Press the power button for the third time, the car purifier will stop working.

Note: If there's no operation during 4 hours, this purifier will shut down automatically.

## III. PURIFIER INSTALLATION

### Storage & Preservation

Please be sure to turn off the purifier and unplug the car charger/power adapter before you leave the car or room.

Clean the air purifier with DRY clothes before preservation.

Keep the air purifier away from wet environment to ensure that the electronic components won't be destroyed by water vapor.

Do not expose item to direct sunlight.
