Beach Inspired

Every homeowner can appreciate the serenity of a quiet day at the beach. Island Stone's Dunes captures that essence, emulating the subtle movement of the sand and dunes dancing gently in the breeze. An elegant interpretation of serene, wind-swept coastlines, the collection featuring Crystal White and Typhoon Grey round out the line's range, which also includes Sandstone Mint and Sandstone Ocean. The elegantly drawn out subway tiles are sculpted with an offset angled surface, forming a flow of connected ridges reminiscent of wind-swept sand dunes. Each color's incandescent surface softens its geometric, sculptural design, creating a marble-like finish.

Rustic Finish

Strasser has expanded its bath vanity collections with Dusky Oak, a rustic, yet sophisticated finish. Dusky Oak presents the same rustic look and feel as reclaimed wood—a building material that is trending throughout residential, hospitality, and commercial interiors. A soulful finish with a time-worn look, Dusky Oak makes a statement with any style of décor, from sleek and modern to classically traditional. Similar to the ageless beauty of reclaimed wood from old barns, factories, and warehouses, Dusky Oak injects a rich sense of character into the bath. It is unique in that its rustic textures seem to echo the past, but the clean lines and modern shapes align with today's transitional and modern décor styles. Blending beautifully with light, muted colors, the versatile Dusky Oak finish pairs well with Polished Chrome, Polished Nickel, and Oiled Bronze hardware finishes—which also help to give a modern update to the rustic look.

Powerful Performance

The new Samsung Jet™ Stick Vacuum offers a lightweight and effortless way to clean with a powerful performance and intense suction. Its lightweight, ergonomic design is perfect for thoroughly cleaning hard-to-reach places and its 200 Air Watts of suction tackles any mess. With convenient features and a sleek design, this Jet Stick Vacuum can clean anywhere in the house and look good when not in use. A highly effective filtration system empties the Jet's canister with ease and prevents dust and debris from entering the air. There are two models of the new Samsung Jet™ Stick Vacuum, the VS90 and the VS90E. The Samsung Jet™ VS90 and VS90E Stick Vacuums are available now in Titan ChroMetal and Aqua ChroMetal.
