

## 5. Unique Subway Tiles

Sculpted with an angled surface that creates shadows, the tiles in Island Stone's Dunes series form a pattern when installed that is meant to evoke wind-swept sand dunes. Each 7 1/2-by-11 3/4-inch tile measures from 1/4 to 5/8 inch thick and is available in four colors: crystal white, typhoon grey, sandstone mint, or sandstone ocean. The tumbled natural stone is ideally installed with grout but can be installed dry stacked, the manufacturer says. Pricing was unavailable. [islandstone.com](http://islandstone.com)
