Raw - Organic - Cold Extracted - Single Origin

Premium Australian Honey Range

Pure Origins Manuka Honey Signature Blend

A unique 'nature's own special blend' of Australian Manuka and Leatherwood Honeys that the bees create themselves sourced from the pure pristine wilderness of Tasmania. Our Signature Blend combines to form a truly luxurious and nutritional Honey.

Available in: 500g.

"We take pride in the fact our honey is cold extracted, not mixed or blended, single origin and raw. Our aim is to have our honey arrive from hive to home. This ensures the bold aroma flavour and nutritional benefits are retained, as nature intended."

Pure Origins Leatherwood Honey

The rare Leatherwood Tree originated nearly 65 million years ago and found in Tasmania, Australia. We source this premium honey from the heart of the Tarkine, in the pristine Tasmanian wilderness.

Available in: 250g & 500g. *Flours, in the pristine Tasmanian wilderness.*

Pure Origins Organic Wild Raw Honey

Collected from the blossoms of Australian Eucalypt trees, clover and ground flora. Sourced from Australia's most pristine wilderness.

It has a sweet, mild flavour suitable for all honey uses.

Available in: 250g & 500g.

Pure Origins Macadamia Honey

Collected from the blossoms of the Macadamia Tree also known as Macadamia Integrifolia and is native to Queensland, Australia. A sweet, mild flavour with a toffee caramel after taste.

Available in: 250g & 500g.

Pure Origins Raw Wild Flower Honey

Collected from a myriad of Australian native floral nectars. This honey is full of distinctive floral flavours from a collection of aromatic native wild flowers

This variety of honey has a distinctive floral taste and deliciously unique.

Available in: 250g & 500g.

Manuka Honey Range

Pure Origins Manuka Honey

Manuka honey is so famously known for its medicinal properties. Commonly titled nature's 'Superfood' for having so many miraculous health benefits. This is all due to the high activity levels of Methylglyoxal (MGO) found in Manuka Honey which has increased levels of antibacterial, anti-fungal, anti-inflammatory, antiviral properties.

Manuka honey is produced by bees that tended to flowers of the Manuka plant (*Leptospermum* species). *Leptospermum* plant is native to both Australia and New Zealand. In fact Australia is home to over 80 species, the largest diversity of *Leptospermum* plants in the world. Our Manuka is sourced from the pure pristine natural wilderness of Australia.

Every batch of Pure Origins Manuka is lab tested for MGO authenticity and rating.

Pure Origins Manuka Honey Range (available in 250g & 500g)

- 30+ MGO
- 100+ MGO
- 250+ MGO
- 400+ MGO
- 800+ MGO
- 1000+ MGO

Our exclusive range of pure premium Australian honeys are carefully selected from Australia's most pristine terrains and exported all over the world.

100% Australian - Raw - Organic - Cold Extracted - Single Origin

Pure Origins is 100% Australian family owned & operated business, with a long family heritage in the agricultural industry. Our passion for high quality, pure Australian honey led to us creating Pure Origins brand, so we could offer our passion to Australia and the rest of the world.

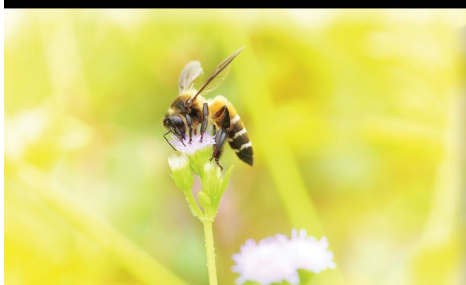

There is no doubt that we are blessed with many great producers of Honey in Australia. Pure Origins works in partnership with a handful of carefully selected bee keepers around Australia, to bring the best possible product to market.

Cold Extracted Honey

Our honey is cold extracted and packed at temperatures lower than the beehive itself. This means that although it takes longer to pour, it retains all of its crucial enzymes, anti-bacterial properties and nutritional value.

Single Origin Honey

Whilst many commercial brands blend and mix honey from various regions nationally and internationally. The honey we receive from our beekeeper we bottle, we do not mix or blend. We take pride that each jar of our honey remains from a Single Origin with-in Australia.

Our #1 philosophy is “In Nature We Trust”
