# How to Cut Fabric Strips

## Step 1:

Fold fabric in half, bringing the selvage edges together and making sure they are even. Fold again in this direction, bringing the center fold up to 1/2" below the selvage edges.

## Step 2:

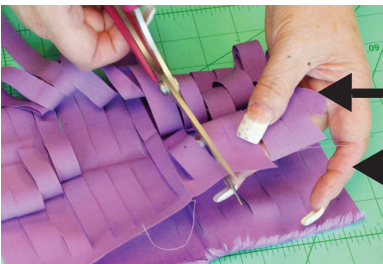

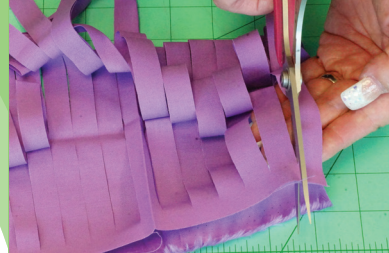

Using a rotary cutter, cut fabric strips, cutting through the folds but NOT through the selvages.

**Tip:** Don't worry if the lines aren't perfectly straight. It will not show on your finished piece.

## Step 3:

Unfold fabric by separating the selvages. Now begin cutting into strips. At the top of the fabric, cut the first strip then cut every two. For the bottom of the fabric you cut every two.

Bottom layer

For bottom strips, start cutting every two.

Then wrap continuous strip around an object such as a slender box.
