# Wedge Iron

Art No. 9200

Wide ergonomic handle for comfort and secure handling.

Easily get under layers of fabric with the Wedge Irons narrow tip.

Large convenient dial for temperature adjustment.

Low ●  
Approx. 175°F- 230°F

Medium ● ●  
Approx. 231°F-300°F

High ● ● ●  
Approx. 301°F- 390°F

Fluororesin coated soleplate for ease of ironing.

Includes small spray bottle for controlled moisture and steam where needed

## “The Wedge” ...The Right Iron for So Many Projects!

This straightforward, portable, iron is the most important tool you will have when it comes to delicate, awkward areas, repeat pressing in quilt making, clothing construction, and so much more!

### Foundation Paper Piecing

### Foundation Paper Piecing

requires that for the best production you need to set up a cutting, sewing, and pressing station. Once set, the assembly process is smooth and accurate. Pressing occurs after each piece of fabric is added to the design. The convenient compact size of the wedge makes this delicate operation enjoyable

### Chain Piecing

### Chain Piecing

is a speed method of sewing when there are the same seams to be made in the exact same position...think half-square triangles or 4-patches. Once each group is sewn, pressing must happen before adding the next section or before trimming. Making the Wedge the perfect tool for the job.

### Bias Tape

### Bias Tape

is much quicker with the use of the Wedge due to its easy temperature control and precision tip.

### Fusible Cord & Piping

### Fusible Cord and Piping

presses even and very sharp as the tip and upper side of the Wedge glides along the edge of the piping, without twisting for a tight clean finish.

## Fuse 'n Gather

## Buttons & Plackets

## Wedge Iron

Art No. 9200

## Fuse 'n Gather

is temperature sensitive and often it is difficult to find just the right setting on a standard iron. With the Wedge the temperature is always correct.

## Buttons & Plackets

are not a stumbling block for this iron. The ease with which the Wedge glides around buttons and placket edges leaves a most professional finish to any shirt or blouse.

## Small & Awkward Seams

are generally a challenge for most standard irons, but this baby gets into those difficult areas...think doll, baby, and children's clothes. While you may never iron baby clothes, if you sew any of these smaller items you will need to press and The Wedge is your "go to" iron.
