

The Agile Scrum Foundation teaches an understanding of Agile principles and Scrum methodology; perfect for anyone leading or working on projects. Covering Agile ways of thinking, Scrum practices, planning and estimation plus how to monitor Scrum projects, this course is ideal, not just for Project Managers, but also for those working in software development, IT service management or business management.

This certification offers a broad understanding of Agile principals and an examination of the Scrum framework - practices and methodologies that are widely used in software development and increasingly other areas of the business, in 29 easy-to-absorb lessons.
