HIGH QUALITY FOR HIGHEST DEMANDS

Guaranteed: The best recoverability!

PROJECTS AND PRODUCTS OF MAX BLANK

... are engineered in the German headquarter in Westheim. Our specialists and engineers generate high quality together with the qualified technical staff. Only the best endures long time. Therefore we set value on manufacturing on our own. 99% of the steel components are manufactured from Max Blank-technicians and specialists. We guarantee a unique high quality product with inspiring pellet- or wood-fireplace-conceptions and accessoires meeting your desires at its best.

DURABILITY OF MATERIALS, CONSTRUCTION AND AESTHETICS ARE MOST IMPORTANT FOR US.

This is definitely evident: all over the world they dabble in making copies of our classics. But our customers shall be prevented to find a copy of their individual fireplaces anyway. Individually for you only!

THAT MAKES MAX BLANK BE ONE STEP AHEAD.

Always looking for optimization, to get warm saving energy and to relax in front of a fireplace admiring playful flames.

Continuously a step in front of the market. Incessantly based on highly sophisticated projects and harmonious shapes at attractive prices. Always offering our customers best services in appropriate competitive price. We follow new paths with novelties and keep on proven solutions. Now and everyday: we manufacture fireplaces and stoves meeting the highest reputation and quality standard.

MANY OF OUR SYSTEM FIREPLACES AND STOVES CAN THE „GOOD“ **RADIANT HEAT**

Well-tempered. Pleasant. Comfortable.

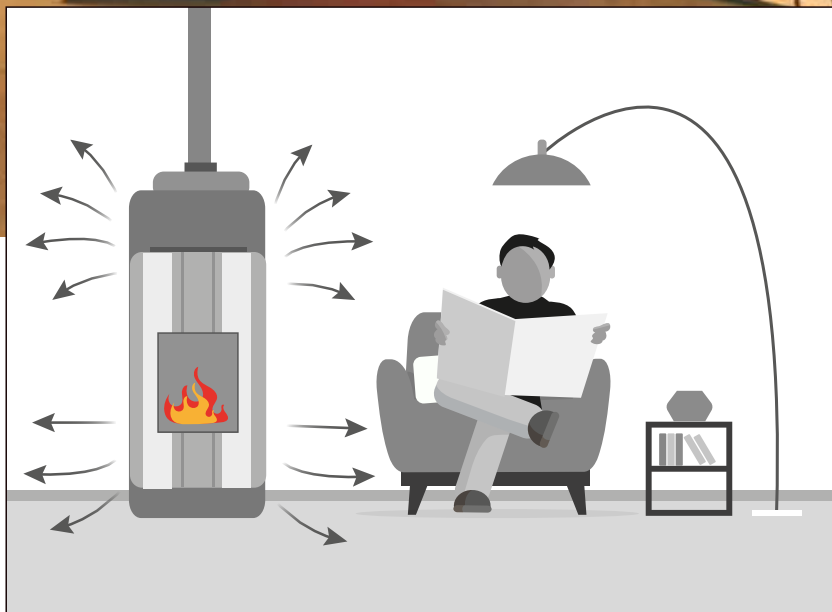

Important to know:

- the air gets a bit drier
- Irregular scattered warmth
- Air turbulence disperses dust

THE CONVECTION HEAT

The convection heat is like a blower, e. g. a hair drier. The swirled and rising air disperses in the room. In contrast to radiant heat nothing is really buffering the warmth. Only the air is getting warm. Opening the door or windows causes quick escape of the convection heat.

Radiant heat

Important to know:

- Pleasant ambient air
- Evenly spread of warmth
- Like sunrays on your body

THE RADIANT HEAT

Effectiveness like sunrays. Just like the sun's radiation our exclusive heat sources hit objects and heats them completely through. Excessive heat is released from the objects. This is precisely the "good" radiant heat which is appreciated as very pleasant, soothing and intense.

YOU ARE IN TWO MINDS: **WOOD OR PELLETS?**

No matter. Our fireplaces and stoves can fire both.

WOOD
POETIC &
ECONOMICAL

Figure: Pellet-System KO1

**FREE AND INDEPENDENT - STAY FLEXIBLE WITHOUT ELECTRICITY.
OUR STOVES OPERATE WITH EVERY SOURCE.
TODAY WITH PELLETS, TOMORROW WITH WOOD.**

Economically generated warmth and buffered heat between 3* to 18* hours (depending on the model) at the end with sinking temperature of the stove's heat. Your exclusive equipment: an electroless pellet-firing system for your wood-burning stove at your best convenience without any manual refilling during the firing period.

*From inflaming the pellets until the complete process of heat dissipation of the natural stone cladding. Depending on the equipment such as memory block. Varies due to the isolation of the living room, the quality of the wood/pellets, the installation of the flue tube and the operating of the stove. Further information: www.maxblank.com

PELLETS

ELECTROLESS &
ROMANTIC

ANGEL FALLS

H 213,5 x W 116 x D 67,5 cm // 642 kg
Wood 5 - 8 kW - 80 %

NIAGARA

H 188 x W 77,5 x D 48,5 cm // 266 kg
Wood 3,3 - 6,5 kW - 83 % // Pellet 7,5 / 11 kW - 87 / 85 %

YOU HAVE SPECIAL REQUESTS IN SHAPE AND COLOR?

We provide the adequate modular fireplace or stove.

**WITH OR WITHOUT BAKING COMPARTMENT?
ROTATABLE OR NOT?
WITH OR WITHOUT HEAT ACCUMULATION?**

Unlimited varieties at your own desires. It's your individual choice: steel, stone, ceramics, with baking compartment, with heat accumulation, rotatable, with wood or pellet and many many more options.

As individual as you.

VARIOUS TYPES OF STOVES:

PELLET STOVE without electricity with a fascinating atmosphere of firing.

PELLET/WOOD STOVE electroless combined pellet-wood stove with up to 18hours warmness depending on the model (see page 7)

WOOD STOVE small up to big, made of steel, stone, ceramics or glasses.

SYSTEM FIREPLACE with classic wood firing or alternatively with combination of electroless pellet or wood firing, modular or integrated.

STOVE WITH BAKING COMPARTMENT with wood firing or electroless combination of wood or pellet firing for heating and recreation, independent and ecological.

SWEDISH STOVE round, cubic, rounded; steel ceramics, valueable natural stone; special wood firing with crystal glass cladding or exclusive as combination with electroless pellet firing system.

EVERYDAY BETTER

OPTIONAL HEATING

Make yourself independent. Our stoves are great all-rounder. The innovative wood-pellet-system enables you to use different ecological resources:

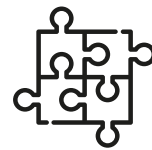

COOL HANDLE

Do not burn your fingers when choosing your stove. You will notice: Your stove understands itself on romantically blazing fire. Only the door handle stays cool!

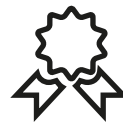

INDIVIDUAL DIVERSITY

Assemble your special desires. Numerous variants, a plenty of functionalities, shapes and colours make YOUR Max Blank stove absolute unique. Just like you and your home.

HIGHEST VALENCE & QUALITY

Without compromise: you may enjoy your stove for many, many years. This is obviously: up to 8 mm strong branded steel Made in Germany and exquisite natural stones from all over the world.

HIGH EFFICIENCY

Less fuel in. Less pollutants out. Depending on the model and choice of fuel, we are proud to offer economical efficiency up to 91%. This protects the environment and caresses your soul and also your pocket.

SALES ONLY VIA SPECIALIST RETAILERS

Only from the specialist: Safety from the beginning. Our experts are our specialized marketeers who unify our quality standard and your expectations. Max Blank lets the fire blaze in your home. Look forward to a stove that exceeds your expectations from the beginning for decades.

Our claim: Perfection in every detail
& an added value for highest demands

YOUR STOVE AS AN ALL-ROUNDER

More than only heating – take advantage of the diversity of our stoves. With our stoves you can not only heat up: They also can accumulate heat, you can change the fuel, let the water run and the light shine. They are also experts in roasting and baking as in grandma's time.

INDIVIDUAL CRAFTSMANSHIP MADE BY MAX BLANK

For sure always something more than you are used to. Therefore, our masterpieces have nothing in common with the industrial manufacturing of many offered stoves. Produced in our Middle Franconian German manufactory and made to inspire you.

EXPERIENCE

Build on the experience of specialized stove producer. Max Blank.High Quality has many decades of experience. This experience and sophisticated know-how are your gain: You always get a product being much more than you initially see: The added value!

10-YEAR GUARANTEE

Long-term security for an indestructible stove. Of course we know what the quality materials of our innovative heaters can withstand. That's why we like to give our customers a 10-year guarantee on the steel substance of the wood burning chambers. (More information about guarantee: www.maxblank.com)
