

Winstar Mobile Radar Sign Stand

The Winstar Mobile Radar Sign Stand makes it possible to use a digital radar speed sign wherever it's needed from schools and campuses to work zones and parking facilities. Built from high-grade steel and aluminum, the stand combines portability, stability, and durability for reliable performance in any environment.

Key Features

Easy Mobility: Quickly relocate the radar speed sign between sites as traffic patterns change.

Compact Transport: Stand fits securely in the bed of a standard pick-up truck for simple transport.

Durable Steel Base: Heavy-duty powder-coated steel platform (34"W x 34"D) in black or safety orange, with four anchor holes for added stability. Base weight: 60 lbs.

Adjustable Pole Options: Choose between 6 ft. (20.25 lbs.) or 8 ft. (27 lbs.) aluminum poles with 3.5" OD.

Reliable Wheels: Equipped with two long-life wheels for smooth movement on pavement or facility grounds.

Optional Add-ons: Fixed optional regulatory SPEED LIMIT sign or interchangeable SPEED LIMIT sign panels available.

Device Compatibility: Designed for use with all Winstar Digital Radar Sign models.

Ideal Applications

Perfect for locations where traffic volume or activity changes throughout the day, such as:

School crossings and student drop-off zones

Shipping docks and loading areas

Business and industrial facility entrances

Parking decks and garages

Campus roadways and pedestrian zones

Warranty:
5 Year Warranty
