

# IQ64Q876    ISA 8172

## Use of the chronograph:

Press button **A** ; the chronograph will start.  
Press button **A** again; the chronograph stops.  
To reset, press button **B**.

## Setting the time:

Pull out the crown completely;  
By turning the crown the time can be set.  
By pulling out the crown just one step, the date can be set.

## Aligning the chronograph:

After a battery-change for instance it's possible that the seconds-counter isn't on the "0" position.  
This can be helped by:

Press both buttons **A** and **B** for a few seconds. The seconds counter should move about 5 seconds.  
Now use button **A** to adjust the seconds counter to it's 12 O'clock position.  
The same can be done for the minutes counter by pressing **B**.  
If all the counters on the correct spot, press **A** and **B** simultaneously again.

## Explanation of dials and counters:

Left-hand side : the minute-counter  
Right-hand side : seconds hand  
Bottom : the day indicator  
The central hand is the seconds counter
