The following diagrams demonstrate how to measure each member of your choir. We recommend that, if possible, the choir is measured by the same people for consistency, and that you refer to our size guides for additional information. If you need any help at all, please get in contact and we'll be more than happy to help.

A. Chest / Bust: Place the tape under the arms and around the fullest part of the chest, allow room for two fingers underneath.
B. Waist: Measure around the natural waistline, breathe out naturally and take your measurement.
C. Collar: The collar size on the cassock is determined by the collar size you would usually wear.
D. Nape - Hem: Ensure you are wearing the shoes you would usually wear with a cassock. Place the tape at the nape of your neck and extend down to where you would like the hem of the cassock to sit. This is usually $3^{\prime \prime}$ from the floor.
E. Sleeve: Measure from the end of the shoulder, along the length of your arm to the point just past the wrist-bone.

Our choir cassocks are cut to your specific chest size and back length. All other measurements are standard, in proportion to the chest and back.

Please use these guides to determine which size you require.

Please check that these sizes are suitable for you, for example if you have a larger stomach you may need to choose a bigger chest size to accommodate it.The sleeve length is determined by the back length. If your arm is shorter than the standard sleeve measurement it is possible for us to alter this in-house for an additional cost.
