

New Software Release GM USA 2018 PINCODE ADS2282

February 2019

Advanced Diagnostics is pleased to announce the new release of GM® USA 2018 ADS2282 pincode reading software.

What does the software do?

ADS2282 software is designed to read pincodes from various GM®, Chevrolet®, Cadillac® and Buick® vehicles with proximity and bladed systems directly from the vehicle's BCM module. Reading through the vehicle BCM, this software does not depend on the type or size of engine installed but rather on the make, model and year. Therefore, this method will greatly enhance success, simplify the process of pincode reading and improve the coverage on GM® vehicles.

If you are on a token plan on Smart Pro, one token is deducted per pincode.

This software is available on Smart Pro only.

Note: Additional software will be required for key programming. Use ADS2187 / ADS2223 for key programming.

APPLICATIONS

* Based on active testing in the field, some variation may occur, we cannot guarantee pin read success on ALL listed vehicles, some vehicles may require the older ADS-223 Engine PIN READ software, if the NEWER BCM PIN READ procedure should happen to fail.

Success has been at or near 100% on the vehicles shown here.
