

New Software **FREE** Update

CHRYSLER® 2018 KEY PROGRAMMING ADS2272

June 2019

Advanced Diagnostics is pleased to announce the release of a new update for Chrysler 2018 ADS2272 key programming software.

What does the software do?

ADS2272 software allows proximity keys to be added, or programmed from a lost key situation and has been designed to bypass the pincode automatically in the background or to read the pin (varies for each system) making it a seamless process when programming keys or a very simple two-step process of reading the pincode and then programming the key's.

The connection to the vehicle is made using the ADC2012 cable, which connects directly to the RFH unit located in the vehicle (locations may vary between models).

Please see the application list below for vehicle coverage or on Info Quest.

Note: This software is available for Smart Pro only. No working key is required. **All previous Applications used the ADC2011 Cable, the Applications in this update will require the NEW ADC2012 Cable.**

What else will I need?

Smart Pro / ADC2012

Smart Pro

ADC2012

Is PINCODE Required?

PINCODE Reading

Cable Required

Is a working Key Required?

* Based on active testing in the field, some variation may occur, we cannot guarantee bypass success on ALL listed vehicles. 2019 models may still be in production by FCA and it's always possible they update or change their security which is beyond our control. Success has been at or near 100% on the vehicles shown here.
