

New Key Programming Software FREE UPDATE!! Subaru ADS2286®

January 2023

Advanced Diagnostics is pleased to announce a free update for ADS2286 Subaru. The new update adds the ability to program replacement keys in All Keys Lost situations when used in conjunction with the new ADC2015 Emulator cable.

What does the software do?

ADS2286 software allows for H bladed keys and remotes to be added and programmed. The software can erase the keys (the key in the ignition is not erased) and program new keys (Max. of 4 Keys/Remotes). The software update provides the ability to program keys/remotes in All Keys Lost situations when used in conjunction with the ADC2015 Emulator cable. Programming is done directly via the OBD2 port. The software has been designed to bypass the security automatically in the background making it a seamless process when programming keys. This is a stand alone software with no need for an internet connection.

A working REMOTE does not need to be present when programming remotes.

What else will I need?

Smart Pro

ADC2015

OFFER DETAILS

Cable	ADC2000B or ADC2013
Smart Aerial required	No
Software category	A
Other accessories required	ADC2015

* Based on active testing in the field, some variation may occur, we cannot guarantee success on ALL listed vehicles. We cannot guarantee that the OEM does not update or change their security which is beyond our control. Success has been at or near 100% on the vehicles shown here.
