

Key Programming Software Update VAG® 2019 ADS2292

October 2021

Advanced Diagnostics is pleased to announce the release of new capability with a free update for the ADS2292 key programming software for Volkswagen/Audi. The software update adds support for select vehicles of the popular UDS KESSY (proximity) platform and the software is stand-alone and **DOES NOT** require connection to a server to complete the procedure.

What does the software do?

The ADS2292 software programs bladed keys and select proximity keys with push button start for Volkswagen models. All keys and remotes will be erased before programming new ones. The software bypasses the security PIN code during the procedure and programs the remote and the transponder at the same time. A working key and the Smart Aerial are required to complete the "Add Key" procedure. All Keys Lost support has been added with this free update. The ADC-219 cable and Smart Aerial are required for All Keys Lost situations.

Note: This software is available for Smart Pro only.

What else will I need?

Smart Pro

Smart Aerial

ADC 219

OFFER DETAILS

Cable	ADC2000B
Smart Aerial required	Yes
Software category	A
Other accessories required	ADC-219 for All Keys Lost situations

* Based on active testing in the field, some variation may occur, we cannot guarantee success on ALL listed vehicles. ADC219 may not work on some dashboards. We cannot guarantee that the OEM does not update or change their security which is beyond our control. Success has been at or near 100% on the vehicles shown here.
