

STAIN HYBRID DYE INSTRUCTIONS

Brow Preparation

Complete a patch test before proceeding with the service.

Cleanse the brow area with an oil-free foaming cleanser. Rinse with a damp cotton pad. Ensure brows are dry and free of oils and sebum for optimal Stain Hybrid Dye adhesion.

Brush the brows upwards and map as needed.

Stain Application

Shake the Stain Hybrid Dye bottle well before use. To a glass mixing dish, add 4 drops of Stain Hybrid Dye with 2 drops of Cream Oxidant. Mix into a creamy paste using a Tinting Brush or Applicator Stick.

Apply Hybrid Dye to the brow to create the desired shape, using precision to ensure a clean result. Use a clean, dry cotton tip to clean up the edges of the brow as you apply.

Leave on for 5 to 10 minutes depending on the desired intensity. For an ombre result, remove the front of the brow after a few minutes.

Prior to removal, ensure the Stain Hybrid Dye is wet by reapplying a small amount of mixture.

Stain Removal

Gently remove using a damp cotton round, starting from the head and moving towards the tail of the brow. Avoid scrubbing back and forth to prevent removing Stain Hybrid Dye from the skin.

Brush the brows in place.
