

PROFESSIONAL EYEBROW TINT FREQUENTLY ASKED QUESTIONS

What is Tint?

Eye-brow tinting is the process of applying Semi-Permanent dye to enhance, shape, and define your brows. Our richly pigmented tint range stains the skin as well as the brow hairs.

How Long Does Tint Last?

Brow Code Tint lasts up to 7 days on the skin and up to 3 to 4 weeks on the brow hairs. Please follow all instructions and aftercare correctly to achieve this longevity.

Can I Pair Lamination And Tint In The Same Service?

Yes, you can pair Lamination and Tint in the same service. We recommend applying tint in between steps 2 and 3 of the Lamination process. Alternatively, you can Tint the brows 24 hours before or after completing the lamination treatment.

Is Tint Safe For Pregnant And Breastfeed Women?

Brow Code Tint is not safe for pregnant and breastfeeding women. If you are pregnant or breastfeeding we recommend consulting with your healthcare professional.
