

PRINTABLE RING SIZER Cheat Sheet

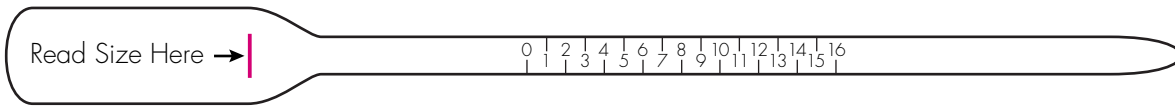

Two Methods to Size Your Ring

How to use this cheat sheet

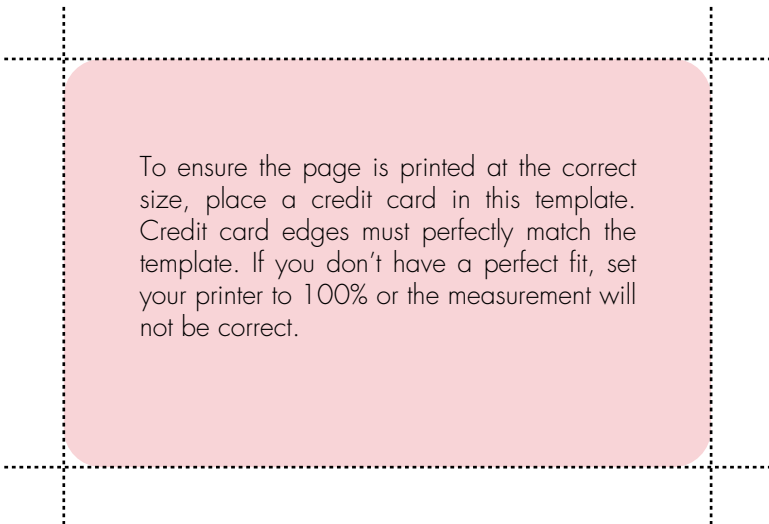

Print this paper right. How? Make sure your printer is set to 100%. To ensure the page is printed at the correct size, place a credit card in the template below: it should fit perfectly.

Now, choose one of the two following methods (or both, for a double check) to measure your Ring Size. If these images are not printed in the actual size, your measurement will be incorrect.

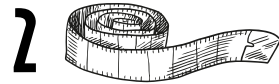

Cut out the ring sizer above, cut a small slit along the pink line.

Place the ring sizer around the finger you want to measure, slip the pointer end through the slit, with the number facing out. Tighten the ring sizer. The fit should be snug.

To ensure the page is printed at the correct size, place a credit card in this template. Credit card edges must perfectly match the template. If you don't have a perfect fit, set your printer to 100% or the measurement will not be correct.

Size	Circumference	
	inches	millimeters
0	1.44	36.5
1	1.54	39.1
2	1.64	41.6
3	1.74	44.2
4	1.84	46.7
5	1.94	49.3
6	2.04	51.8
7	2.14	54.4
8	2.24	56.9
9	2.34	59.5
10	2.44	62.1
11	2.54	64.6
12	2.64	67.2
13	2.74	69.7
14	2.85	72.3

Cut out the ruler

Wrap the ruler inside your ring and write down the measurement: that's your finger's circumference. If you don't have a ring to measure, wrap the same ruler around your finger. Now compare the measurement to the chart above to find your ring size.
