Dimensions	312x312x500mm
Weight	9.5Kg
Material	Steel/Leather
Finish	<div></div> Ts-Bs
Country of origin	England
Year of Design	2024

Description

The Fret stool is an elegant piece of furniture, a stainless steel chair with a brushed finish held together by genuine leather straps with our fretwork pattern carefully pressed into each one.

inspired by the Gingerbread houses of Port of Spain, Trinidad, wooden structures influenced by French and British rule, that left an indelible mark on the city, extending well into the 1950s. Structures that captivated Boateng during his childhood chapter spent residing and exploring the twin Isle.

The chairs’ form has references from the architecture of these buildings, more specifically the arches proudly perched at the entrance of the houses gracefully cascading down to form stunning archways.
