

OCEAN TECHNOLOGY SYSTEMS

THE WORLD LEADER IN FULL FACE MASKS AND UNDERWATER COMMUNICATIONS

IT'S TIME FOR AN **UPGRADE**

OTS Full Face Masks' (FFM) are second to none in comfort, style, fit, and function. We offer the best FFMs in field of vision and have designed our masks with the most user friendly features. Whether you are a working diver looking to use a FFM for practical application or a sport diver looking to take your diving experience to the next level, we are confident we have the FFM for you!

TECHNOLOGY IN DEPTH.

THE GUARDIAN FULL FACE MASK

With the Guardian Full Face Mask (GFFM) we designed a Full Face Mask (FFM) that we felt encompassed what was missing with other FFMs on the market. We wanted to create a product durable and rugged with all inclusive features such as a built in Ambient Breathing Valve® (ABV) to conserve tank air, an easily removable second stage regulator, superb field of vision and a self defogging system.

We also wanted to ensure that fit and function were at the forefront of the design. The Guardian FFM eliminates the need for a bite down regulator which curbs dry mouth and eliminates jaw fatigue.

Our comfortable no leak double seal allows for more faces to fit our standard design than any other mask on the market. Our easily removable straps allow for more forgiving usage lessening the risk of tearing the skirt. The Guardian FFM side mounted regulator adds to the masks low profile and automatically keeps bubbles out of your view. Throw in a customizable equalizing block to allow for easy clearing of your ears and we have all your bases covered.

The GFFM is the premier choice for any diver looking for durability, luxury, and an easy to use product.

MULTIPLE COLOR OPTIONS AVAILABLE!

FEATURES

REMOVABLE 2ND STAGE REGULATOR

Our one touch regulator quick release allows easy removal of the 2nd stage regulator for a no fuss user experience and streamlined gear maintenance

DOUBLE FACE SEAL

Our soft yet durable no leak double seal allows for a one size design fitting more faces than any other mask on the market.

AMBIENT BREATHING VALVE (ABV)

The ABV® allows the user to conserve tank air while at the surface by simply rotating the ABV open.

QUICK DISCONNECT ASSEMBLY

The internal quick disconnect assembly allows a user to quickly detach their regulator from the mask, eliminating the need for a hose QD.

5 POINT HEAD HARNESS

A 5 point head harness ensures the diver has a secure fit of the mask to their face and eliminates the likelihood of the mask unintentionally coming off.

SELF-DEFOGGING AIRFLOW SYSTEM

Our self-defogging airflow system ensures the Guardian FFM stays fog free throughout your entire dive, every time.

BUILT FOR EVERYONE

With the design challenge in mind to cover a wider “spectrum” of divers, we wanted to create a Full Face Mask (FFM) that put the price control in the hands of the user without sacrificing design, look, or function. The Spectrum Full Face Mask (FFM) serves as the most customizable FFM with the best price on the market allowing you to decide which features you’ll pay for.

SPECTRUM FULL FACE MASK

The Spectrum FFM's soft flexible material feels like a dream in comfort. Its lightweight design makes traveling with a FFM easier and more cost effective than ever before. Unlike most other FFMs, The Spectrum offers a pinch-your-nose method ensuring that those new to FFM diving have a familiar experience. The Spectrum FFM also allows you to use most any second stage regulator ensuring you don't have to give up your favorite regulator while diving FFM.

With add on options such as the Ambient Breathing Valve® (ABV) to conserve air at the surface, mounts/ brackets for adding cameras or lights, and communications to stay connected, you now have the option to build your mask how you want it or stick with the bare necessities.

USE YOUR OWN REG

Don't be forced to give up your favorite regulator while using a Full Face Mask (FFM). The Spectrum FFM allows you to use virtually any modern standard second stage regulators with easy installation and removal.

EASY EQUALIZATION

Equalizing is a breeze with The Spectrum FFM's pinch-your-nose method. There are no assemblies or adjustments to make. Just pinch-your-nose and go!

COMMUNICATIONS COMPATIBILITY

Use any of our easy to install wireless or hardwire communications with our Spectrum FFM to stay connected while you dive.

*Guardian communications are interchangeable.

MULTIPLE COLORS AVAILABLE!

- Black Skirt / Coated Lens
- Black Skirt / Clear Lens
- Blue Skirt / Coated Lens
- Blue Skirt / Clear Lens

ACCESSORIES

GFFM RAIL SYSTEM with SOLA 800 / 1200

The GFFM Accessory Rail System easily attaches to the Guardian Full Face Mask and makes it possible to mount various devices to the sides of the mask including a SOLA 800/1200 light. The quick disconnect feature allows surface support to quickly exchange or replace devices as the mission dictates without removing the mask from the diver, or the diver from the water. Can be mounted on either side of the mask.

GFFM RAIL SYSTEM with Universal Light Bracket

The Accessory Rail System with Universal Light Bracket allows virtually any light to be mounted to the Guardian Full Face Mask. One rail may be used or two may be mounted (one on each side). The attachment method does not interfere with ABV® (Ambient Breathing Valve).

GUARDIAN FFM EYEWEAR KIT

Add your prescription lenses to wire frames in your OTS Guardian FFM. Enjoy a clear view underwater with securely mounted, custom engineered and field-tested prescription ready eye gear.

SPECTRUM ABV®

The OTS Spectrum Ambient Breathing Valve allows a diver to conserve tank air by simply opening the valve on the mask! This is a great addition for any diver who waits for their dive buddy to finish getting ready or hanging out on the surface after a dive!

SPECTRUM CAMERA MOUNT

The OTS Spectrum Camera mount allows for quickly mounting a GoPro® or similar type camera! It is easily attached to the top frame of the mask via a single screw allowing a diver to record video hands-free during a dive!

SPECTRUM UNIVERSAL LIGHT BRACKET

The Spectrum Accessory Bracket allows a diver to mount most (round) 3rd party lights to the side of the Spectrum Full Face Mask. This is great for night dives or anytime where additional light is required! The Spectrum Accessory Bracket allows for two mounting positions : high or low.

GOPRO® / LIGHT COMBO MOUNT

Compatible with GFFM Rail System / Spectrum Bracket

Adding this Inodive mount to a Rail System Slide allows you to mount a GoPro® camera and a light on the same slide. This will work with Universal Slide, Inodive Light, as well as Light & Motion SOLA Lights (Requires SOLA Mount Slide & D-Ring Kit).

360° SWIVELS / 90° ELBOWS & QUICK DISCONNECTS

The Omniswivel 360 degree swivels and 90 degree elbows allows free range of motion & better low pressure hose routing. The Quick Disconnect allows a user to quickly disconnect a hose from their FFM. All items fit the Guardian Full Face Mask / Spectrum Full Face Mask & all standard 2nd stage regulators.

OCEAN TECHNOLOGY SYSTEMS

OTS has long been the leader in Full Face Masks and Underwater Communications equipment for Militaries, Search and Rescue Teams, Commercial Divers, the Entertainment Industry and Sport Divers across the globe. With over 35 years of experience, OTS diligently works to provide the highest quality products available on the market for every level of diver. If reliable and durable equipment is what you need, look no further.
