

QUARTER ROUNDS GLASS TILE INSTALLATION GUIDELINES

Please read carefully before beginning installation.

We recommend the hiring of a licensed professional tile installer who is experienced with the installation of glass tile.

The owner or owner's representative is responsible for determining the acceptability of the product. Prior to installation OPEN AND INSPECT ALL BOXES to verify tile series, size/pattern, color and finish. Notify your tile dealer immediately of any damage, defect or other issue. Variation in surface, color, shade, shape and size are inherent in artistic hand-crafted tile. Lunada Bay Tile recommends a random sampling be taken from multiple boxes, inspected and blended prior to and throughout the installation process. Installation constitutes acceptance.

When installing our Lunada Bay Tile Quarter Rounds edge detail, float or finish the outside corner edges in advance for placement of the Quarter Rounds tile piece. Do not leave gapping or spacing behind the tile.

Tip: Detail can be floated using a piece of the quarter round for exact dimensions.

Apply layer of recommended bright white glass tile thin-set mortar. We recommend using a 3/16 by 1/4 V-notch trowel. Please see Installation Guidelines for Standard Glass: http://LunadaBayTile.com/PDF/LBT_installation_glass.pdf

If installation is over a board system, make sure corners are flush, level and in plane. Do not make up differences by thickening the setting material.

Remember to key the setting material to the substrate with a trowel to initiate bonding. Gauge or notch thin-set and knock down/flatten the comb marks prior to installation.

Important: Opposing planes are points of stress. Glass Quarter Round pieces should not be back filled prior to installation.
