Shade Variation	Grout Joint Recommendation		NOTES		
V4 - Substantial Variation	1/16" (1.6 mm)		Since variations are common in artistic glass tile, we recommend final selection be made from an actual tile mock-up. To achieve optimal results in shading, layout and design, tile should be randomly selected from multiple boxes during installation. We recommend a minimum of 10% coverage on all orders. Installation constitutes acceptance. We advise retaining control samples to aid in color matching if additional material is required (match not guaranteed).
