E-30P EasiFlo™ Recirculating System

The EasiFlo™ Recirculating System is a unique, affordable solvent recirculating system that will dramatically reduce the amount of chemical used to remove ink from screens. The EasiFlo System triple filters (bag filter, sludge baffle, 2 cartridge filters) the screen cleaning solvent as you wash screens, which provides maximum solvent life.

Features:

-  Pnuematic Pump
-  Regulator with Shut Off Valve
-  2 - Removable Bag Filters
-  2 - Canister Filters
-  Brush System
-  Solvent Resistant Hose

How to Use:

From the booth, the solution will flow through 2 removable bag filters in to the main basin (sludge baffle), and through 2 canister filters on the end and the back through to the brush system located in the booth.
